ETRS Test Record

- Each EAS Participant should file a separate copy of Form One for each its EAS decoders, EAS encoders, and units combining such decoder and encoder functions. For example, if you are filing for a broadcaster (or cable headend) that uses two units combining decoder and encoder functions, you should file two copies of Form One. If your EAS Participant shares an EAS encoder/decoder with another EAS Participant, each EAS Participant should file its own copies of Form One for that EAS encoder/decoder.
- EAS Participants that pre-populate Form One using a Facility ID number or a Physical System ID number are urged to review their pre-populated data to ensure accuracy. Outdated or inaccurate data fields that cannot be edited in ETRS are populated from the EAS Participant's filings in the Commission's Online Public Inspection File (OPIF). Accordingly, EAS Participants must ensure that their OPIF information is correct for it to appear accurately in ETRS.
- Please save your form data periodically by clicking the Save Draft button that is located at the bottom of each form. The current session time-out is 30 minutes.
