

COVID-19 Regulatory Activities for Nuclear Materials

Office of Nuclear Material Safety and Safeguards

Nuclear Materials Relief Request

By letter dated April 7, 2020 (ML20094G166), the NRC provided guidance describing the regulatory options for licensees (including byproduct material, uranium recovery, decommissioning (both materials and reactors), fuel facilities, and spent fuel storage facilities) to seek regulatory relief that may be necessary during the COVID-19 Public Health Emergency. In this letter, the NRC notes its authority to provide exemptions from its regulations and amendments to license conditions and technical specifications when applicable criteria are met. This form is intended to assist licensees, that anticipate they will be unable to comply with a regulatory requirement or license condition, with contacting the NRC electronically and to initiate the process with NRC for seeking regulatory relief.
