According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB number is 0535-0243. The time required to complete this information collection is estimated to average 50 minutes, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The U.S. Department of Agriculture has sent you several surveys in the past to identify agricultural activity on your land. To date, we have not received your response.

As we prepare for the 2022 Census of Agriculture, it is of the utmost importance that we get your answers to the enclosed four questions. If you have agricultural activity, we will send you a 2022 census questionnaire so that you are represented in these widely-used, collected just once-every-five-years data. If you do not have agricultural activity, we will update our records upon receipt of this card and cease contact. Please respond today by completing the yes-or-no questions, detaching the questions part of the card, and returning it to your mailbox.

The USDA's Census of Agriculture is the only source of comprehensive agricultural data in the nation. It provides valuable information used at the national, state, and local levels to plan for the future. To learn more about the census, please visit [www.nass.usda.gov/AgCensus](http://www.nass.usda.gov/AgCensus). If you have questions, call toll-free (888) 424-7828.
