As part of the PJAC implementation study, the evaluation team is interviewing staff from various parts of the child support agencies, staff from affiliated court systems, as well as staff from their community partner organizations. These interviews are intended to enhance the evaluation team's understanding of the implementation of typical child support processes, PJAC service delivery, and community partner organization services, as well as contextual factors influencing services. The PJAC program is funded and led by the Office of Child Support Enforcement, part of the US Office of Health and Human Services, and the evaluation is being conducted by MDRC, Center for Court Innovation, and MEF Associates.

I understand that:

- Participation in this interview by child support staff or community partner organization staff is completely voluntary. Refusal to participate will have no influence on my standing within the agency or organization, and I may leave the interview at any time or decline to answer questions.
- Participation and responses will remain private and there is no known risk to participating. Only authorized persons-- a small number of researchers at MDRC-- will have access to information gathered. My identity will not be revealed in any reports or publications resulting from the study.
