# FOREIGN PRODUCERS'/EXPORTERS' QUESTIONNAIRE

### LARGE VERTICAL SHAFT ENGINES FROM CHINA

This questionnaire must be received by the Commission by October 21, 2020

See last page for filing instructions.

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its countervailing duty and antidumping duty investigations concerning large vertical shaft engines from China (Inv. Nos. 701-TA-637 and 731-TA-1471 (Final)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII.

n produced or exported large vertical shaft engines in y 1, 2017?	n China (as defined on next page) at any time

#### PART I.—GENERAL INFORMATION

**Background.**—This proceeding was instituted in response to petitions filed on January 15, 2020, by the Coalition of American Vertical Engine Producers (Kohler Co., Kohler, Wisconsin, and Briggs & Stratton Corporation, Wauwatosa, Wisconsin). Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes affirmative determinations of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at

https://usitc.gov/investigations/701731/2020/vertical shaft engines china/final.htm.

<u>Large vertical shaft engines</u> covered by these investigations are spark-ignited, non-road, large vertical shaft engines, whether finished or unfinished, whether assembled or unassembled, designed primarily for use in riding lawn mowers and zero-turn radius lawn mowers. Engines meeting this physical description may also be designed for use in other non-hand-held outdoor power equipment. The subject engines are spark ignition, single or multiple cylinder, air cooled, internal combustion engines with vertical power take off shafts with a minimum displacement of 225 cubic centimeters ("cc") and a maximum displacement of 999cc. Typically, engines with displacements of this size generate gross power of between 6. 7 kilowatts ("kw") to 42 kw.

Engines covered by this scope normally must comply with and be certified under Environmental Protection Agency (EPA) air pollution controls title 40, chapter I, subchapter U, part 1054 of the Code of Federal Regulations standards for small non-road spark-ignition engines and equipment. Engines that otherwise meet the physical description of the scope but are not certified under 40 CFR part 1054 and are not certified under other parts of subchapter U of the EPA air pollution controls are not excluded from the scope of this proceeding. Engines that may be certified under both 40 CFR part 1054 as well as other parts of subchapter U remain subject to the scope of this proceeding.

For purposes of these investigations, an unfinished engine covers at a minimum a sub-assembly comprised of, but not limited to, the following components: crankcase, crankshaft, camshaft, pistons(s), connecting rod(s), and oil pan. Importation of these components together, whether assembled or unassembled, and whether or not accompanied by additional components such as a manifold, cylinder head(s), valve train, or valve cover(s), constitutes an unfinished engine for purposes of these investigations. The inclusion of other products such as spark plugs fitted into the cylinder head or electrical devices (e.g., ignition modules, ignition coils) for synchronizing with the motor to supply tension current does not remove the product from the scope. The inclusion of any other components not identified as comprising the unfinished engine subassembly in a third-country does not remove the engine from the scope.

The engines subject to these investigations are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) in subheading 8407.90.10 and imported under statistical reporting numbers: 8407.90.1020, 8407.90.1060, and 8407.90.1080. Engines subject to these investigations may also be imported under HTSUS 8407.90.9060 and 8407.90.9080. The engine subassemblies that are subject to these investigations are imported under HTSUS 8409.91.5085 and 8409.91.9990. The HTSUS statistical reporting numbers are provided for convenience and customs purposes only, and the written description of the merchandise under investigation is dispositive.

**Reporting of information**.—If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (*i.e.*, a producer, importer, purchaser and/or foreign producer questionnaire), you need not respond to duplicated questions.

<u>Confidentiality</u>.—The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. §1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

<u>Verification</u>.—The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

**Release of information**.—The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

<u>Valid number error messages.</u>—If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue is provided at the end of this questionnaire and is available upon request from Charlie Cummings (202-708-1666, <u>Charles.Cummings@usitc.gov</u>).

## PART II.—TRADE AND RELATED INFORMATION

Further information on this part of the questionnaire can be obtained from Charlie Cummings (202-708-1666, <a href="mailto:Charles.Cummings@usitc.gov">Charles.Cummings@usitc.gov</a>). Supply all data requested on a <a href="mailto:calendar-year">calendar-year</a> basis.

II-1.	Contact information.—Please identify the responsible individual and the manner by which				
	Commission st	taff may contact that individual re	egarding the confidential information subr	nitted	
	in part II.	·			
	Name				
	Title				
	Email				
	Telephone				

II-2a. <u>Changes in operations.</u>—Please indicate whether your firm has experienced any of the following changes in relation to the production of large vertical shaft engines since January 1, 2017.

(che	ck as many as appropriate)	(If checked, please describe the nature, date(s), and significance of any such reported changes as well as the business reasons for them; leave completely blank if not applicable)
	plant openings	
	plant closings	
	relocations	
	expansions	
	acquisitions	
	consolidations	
	prolonged shutdowns or production curtailments	
	revised labor agreements	
	other (e.g., technology)	

II-2b.	COVID-19 pandemic Since January 1, 2020, has the COVID-19 pandemic or have any			
	government actions taken to contain the spread of the COVID-19 virus resulted in changes in			
	relation to the production and sales of large vertical shaft engines?			

No	Yes	If yes, supply details as to the time, nature, and significance of such changes and provide underlying assumptions.

II-2c. <u>Anticipated changes in operations</u>.—Does your firm anticipate any changes in the character of its operations or organization (as noted above) relating to the production of large vertical shaft engines in the future?

No	Yes	If yes, supply details as to the time, nature, and significance of such changes and provide underlying assumptions.

II-3a. **Production using same machinery**.—Please report your firm's production of products using the same equipment, machinery, or employees as used to produce large vertical shaft engines, and the combined production capacity on this shared equipment, machinery, or employees in the periods indicated.

"Overall production capacity" or "capacity" –The level of production that your establishment(s) could reasonably have expected to attain during the specified periods for all products manufactured in that establishment using the same manufacturing equipment. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup).

Note.—If your firm does not produce any out-of-scope merchandise on the same machinery and equipment as scope merchandise then the "overall production capacity" numbers reported in this question should be exactly equal to the "average production capacity" numbers reported in question II-9. If, however, your firm does produce out-of-scope merchandise using the same machinery and equipment as scope merchandise, then the "average production capacity" reported in question II-9 should exclude the portion of "overall production capacity" that was used to produce this out-of-scope merchandise.

*"Production"* –All production in your establishment(s) in China, including production consumed internally within your firm.

II-3a. **Production using same machinery**.—**Continued**.

Quantity (in units)						
	Calendar years			January-June		
Item	2017	2018	2019	2019	2020	
Overall production capacity <sup>1</sup>						
Production of: Large vertical shaft engines <sup>2</sup>	0	0	0	0	0	
Other products <sup>3</sup>						
Total production using same machinery or workers	0	0	0	0	0	

<sup>&</sup>lt;sup>2</sup> Data entered for production of large vertical shaft engines will populate here once reported in question II-9.

II-3b. **Operating parameters.**—The production capacity reported in II-3a is based on the following operating paramaters:

II-3c.	<u>Capacity calculation.</u> —Please describe the methodology used to calculate overall production capacity reported in II-3a, and explain any changes in reported capacity.
II-3d.	<u>Production constraints</u> .—Please describe the constraint(s) that set the limit(s) on your firm's production capacity.

<sup>&</sup>lt;sup>3</sup> Please identify these products: \_\_\_\_\_.

11-4.	Product si	niπing.—									
		-	able to switch production (capacity) between large vertical shaft engines and cts using the same equipment and/or labor?								
	No	Yes	If yes— $(i.e., have produced other products or are able to produce other products) Please identify other actual or potential products.$								
	be	etween pr	ribe the factors that affect your firm's ability to shift production capacity oducts (e.g., time, cost, relative price change, etc.), and the degree to which is enhance or constrain such shifts.								
II-5.			at percentage of your firm's total sales in its most recent fiscal year was sof large vertical shaft engines? percent.								
II-6a.	<u>Firm's estimated share of production in China</u> .—Please estimate the percentage of total production of large vertical shaft engines in China accounted for by your firm's production in 2019 percent.										
II-6b.	Firm's estimated share of country's exports.—Please estimate the percentage of total exports to the United States of large vertical shaft engines from China accounted for by your firm's exports in 2019 percent.										
II-7.		-	actions.—Is the large vertical shaft engines exported by your firm subject to ervailing duty/safeguard findings, remedies, or proceedings?								
	No	Yes	If yes-List the products(s), countries affected, and the date of such findings/remedies/proceedings.								
II-8			your firm provide product warranties for your firm's exports of large vertical United States? If yes, please briefly summarize the warranties provided.								
	No	Yes	If yes, please briefly summarize the warranties provided.								

II-9. <u>Trade data</u>.—Report your firm's production capacity, production, shipments, and inventories related to the production of large vertical shaft engines in your establishment(s) in China during the specified periods. Do not include resales of large vertical shaft engines that your firm did not produce in this question; those data to the degree they are exported to the United States should only be reported in question II-10.

<u>Do not submit data by manufacturing facility if they are in the same country.</u> If your firm has multiple manufacturing establishments within one country, you are required to combine data for those establishments within one foreign producer questionnaire response.

"Average production capacity" or "capacity" –The level of production that your establishment(s) could reasonably have expected to attain during the specified periods for all products manufactured in that establishment using the same manufacturing equipment. Assume normal operating conditions (i.e., using equipment and machinery in place and ready to operate; normal operating levels (hours per week/weeks per year) and time for downtime, maintenance, repair, and cleanup; and a typical or representative product mix).

"Production" – All production in your establishment(s) in China, including production consumed internally within your firm.

**"Shipments"**—Shipments of products produced in your establishment(s) in China. Quantities reported should be net of returns.

"Home market commercial shipments"—Shipments, other than internal consumption and transfers to related firms, within China.

"Home market internal consumption/transfers to related firms"—Shipments made to related firms in China, including product consumed internally by your firm.

**"Export shipments"**—Shipments to destinations outside of the country indicacted on page 1 (China), including shipments to related firms.

"Inventories"—Finished goods inventory, not raw materials or work-in-progress.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.

### II-9. <u>Trade data</u>.—Continued.

<u>RECONCILIATION OF SHIPMENTS, PRODUCTION, AND INVENTORY.</u>—Generally, the data reported for the end-of-period inventories (i.e., line J) should be equal to the beginning-of-period inventories (i.e., line B), plus production (i.e., line C), less total shipments (i.e., lines D, E, F, and G). Please ensure that any differences are not due to data entry errors in completing this form, but rather actually reflect your firm's records; and also provide any likely explanations for any differences (e.g., theft, loss, damage, record systems issues, etc.) if they exist.

II-11.	Other explanations.—If your firm would like to further explain a response to a question in Part II for which a narrative box was not provided, please note the question number and the explanation in the space provided below. Please also use this space to highlight any issues your firm had in providing the data in this section, including but not limited to technical issues with the MS Word questionnaire.

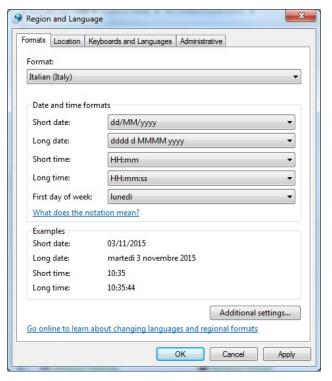

Correcting Valid number error messages.—If you are completing a Commission questionnaire in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. This issues stem from your computer number formatting setting (e.g., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (,) delineate multiples of 1000 and periods (.) delineate fractions less than one. Many EU countries use the reverse where multiples of 1000 are delineated with periods (.) and fractions less than one are delineated with commas (,). The U.S. International Trade Commission's questionnaires are setup in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tah
- Change the Format from your existing one (e.g. "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC foreign producer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to Italy settings.

# **HOW TO FILE YOUR QUESTIONNAIRE RESPONSE**

This questionnaire is available as a "fillable" form in MS Word format on the Commission's website at:

https://usitc.gov/investigations/701731/2020/vertical shaft engines china/final.htm.

**Please do not attempt to modify the format or permissions of the questionnaire document**. Please submit the completed questionnaire using one of the methods noted below. If your firm is unable to complete the MS Word questionnaire or cannot use one of the electronic methods of submission, please contact the Commission for further instructions.

• <u>Upload via Secure Drop Box</u>.—Upload the MS Word questionnaire along with a scanned copy of the signed certification page (page 1) through the Commission's secure upload facility:

Web address: <a href="https://dropbox.usitc.gov/oinv/">https://dropbox.usitc.gov/oinv/</a> Pin: ENGCN

• E-mail.—E-mail your questionnaire to <a href="Charles.Cummings@usitc.gov">Charles.Cummings@usitc.gov</a>; include a scanned copy of the signed certification page (page 1). Submitters are strongly encouraged to encrypt nonpublic documents that are electronically transmitted to the Commission to protect your sensitive information from unauthorized disclosure. The USITC secure drop-box system and the Electronic Document Information System (EDIS) use Federal Information Processing Standards (FIPS) 140-2 cryptographic algorithms to encrypt data in transit. Submitting your nonpublic documents by a means that does not use these encryption algorithms (such as by email) may subject your firm's nonpublic information to unauthorized disclosure during transmission. If you choose a non-encrypted method of electronic transmission, the Commission warns you that the risk of such possible unauthorized disclosure is assumed by you and not by the Commission.

**If your firm** did not produce or export this product, please fill out page 1, print, sign, and submit a scanned copy to the Commission.

**Parties to this proceeding.**—If your firm is a party to this proceeding, you are required to serve a copy of the completed questionnaire on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties may be obtained from the Commission's Secretary (202-205-1803). A certificate of service must accompany the completed questionnaire you submit (see 19 CFR § 207.7). Service of the questionnaire must be made in paper form.
