PART I.—GENERAL INFORMATION

Background.--This proceeding was instituted in response to a petition filed on June 30, 2020, by Insteel Industries Inc., Mount Airy, North Carolina; Mid South Wire Company, Nashville, Tennessee; National Wire LLC, Conroe, Texas; Oklahoma Steel & Wire Co., Madill, Oklahoma; and Wire Mesh Corp., Houston, Texas. Countervailing and antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and dumping. Questionnaires and other information pertinent to this proceeding are available at https://www.usitc.gov/investigations/701731/2020/standard_steel_welded_wire_mesh_mexico/final.htm

Standard steel welded wire mesh.--The product covered by this definition is uncoated standard welded steel reinforcement wire mesh ("wire mesh") produced from smooth or deformed wire. Subject wire mesh is produced in square and rectangular grids of uniformly spaced steel wires that are welded at all intersections. Sizes are specified by combining the spacing of the wires in inches or millimeters and the wire cross-sectional area in hundredths of square inch or millimeters squared. Subject wire mesh may be packaged and sold in rolls or in sheets.

Subject wire mesh is currently produced to ASTM specification A1064/A1064M, which covers carbon-steel wire and welded wire reinforcement, smooth and deformed, for concrete in the following seven styles:

1. 6X6 W1.4/W1.4 or D1.4/D1.4
2. 6X6 W2.1/W2.1 or D2.1/D2.1
3. 6X6 W2.9/W2.9 or D2.9/D2.9
4. 6X6 W4/W4 or D4/D4
5. 6X12 W4/W4 or D4/D4
6. 4X4 W2.9/W2.9 or D2.9/D2.9
7. 4X4 W4/W4 or D4/D4

The first number in the style denotes the spacing between the longitudinal wires and the second number denotes the spacing between the transverse wires. In the first style listed above, for example, "6X6" denotes a grid size of six inches by six inches. "W" denotes the use of smooth wire, and "D" denotes the use of deformed wire in making the mesh. The number following the W or D denotes the cross-sectional area of the transverse and longitudinal wires in hundredths of a square inch (i.e., W1.4 or D1.4 is .014 square inches).

Smooth wire is wire that has a uniform cross-sectional diameter throughout the length of the wire.

Deformed wire is wire with indentations or raised transverse ribs, which results in wire that does not have a uniform cross-sectional diameter throughout the length of the wire.

Rolls of subject wire mesh are currently produced in the following styles and actual width and length combinations:

Style: 6X6 W1.4/W1.4 or D1.4/D1.4 (i.e., 10 gauge)

Roll Sizes: 5' X 50'
5' X 150'
6' X 150'

5' X 200'
7' X 200'
7.5' X 200'

Style: 6X6 W2.1/W2.1 or D2.1/D2.1 (i.e., 8 gauge)
Roll Sizes: 5' X 150'

Style: 6X6 W2.9/W2.9 or D2.9/D2.9 (i.e., 6 gauge)
Roll Sizes: 5' X 150'
7' X 200'

All rolled wire mesh is included in scope regardless of length.

Sheets of subject standard welded wire mesh are currently produced in the following styles and actual width and length combinations:

Style: 6X6 W1.4/W1.4 or D1.4/D1.4 (i.e., 10 gauge)
Sheet Size: 3'6" X 7'

7'6" X 20'
8' X 12'6"
8' X 15'

Sheet Size: 5' X 10'
8' X 12'6"
8' X 12'8"
8' X 15'
8' X 20'

Any product imported, sold, or invoiced in one of these size combinations is included in this definition.

ASTM specification A1064/A1064M provides for permissible variations in wire gauges, the spacing between transverse and longitudinal wires, and the length and width combinations. To the extent a roll or sheet of welded wire mesh falls within these permissible variations, it is included in this definition.

ASTM specification A1064/A1064M also defines permissible oversteeling, which is the use of a heavier gauge wire with a larger cross-sectional area than nominally specified. It also permits a wire diameter tolerance of + 0.003 inches for products up to W5/D5 and + 0.004 for sizes over W5/D5. A producer may oversteel by increasing smooth or deformed wire diameter up to two whole number size increments on Table 1 of A1064. Subject wire mesh has the following wire diameter ranges, which account for both oversteeling and diameter tolerance:

W/D No.	Maximum Oversteeling No.	Diameter Range (inch)
1.4	(i.e., 10 gauge)	3.4 0.093 to 0.211
2.1	(i.e., 8 gauge)	4.1 0.161 to 0.231
2.9	(i.e., 6 gauge)	4.9 0.189 to 0.253
4.0	(i.e., 4 gauge)	6.0 0.223 to 0.280

To the extent a roll or sheet of wire mesh falls within the permissible variations provided above, it is within this scope.

In addition to the tolerances permitted in ASTM specification A1064/A1064M, wire mesh in this definition includes combinations where:

1. A width and/or length combination varies by + one grid size in any direction, i.e., + 6 inches in length or width where the wire mesh's grid size is "6X6"; and/or
2. The center-to-center spacing between individual wires may vary by up to one quarter of an inch from the nominal grid size specified.

Length is measured from the ends of any wire and width is measured between the center-line of end longitudinal wires.

Additionally, although the subject wire mesh typically meets ASTM A1064/A1064M, the failure to include certifications, test reports or other documentation establishing that the product meets this specification does not remove the product from the scope. Wire mesh made to comparable foreign specifications (e.g., DIN, JIS, etc.) or proprietary specifications is included in the scope.

Excluded from the scope is wire mesh that is galvanized (i.e., coated with zinc) or coated with an epoxy coating. In order to be excluded as galvanized, the excluded welded wire mesh must have a zinc coating thickness meeting the requirements of ASTM specification A641/A641M. Epoxy coating is a mix of epoxy resin and hardener that can be applied to the surface of steel wire.

Wire mesh is currently imported under statistical reporting numbers 7314.20.0000 and 7314.39.0000. of the Harmonized Tariff Schedule of the United States ("HTSUS"). The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

Engineered wire mesh.-- Engineered wire mesh (also referred to as "structural mesh") is assembled from steel wires welded together in a grid pattern, complies with ASTM A1064 or equivalent specifications, and is designed to reinforce concrete. Being custom designed for specific end uses and customers, engineered wire mesh often, but not always, consists of non-uniform or heavier wires, non-uniform grid sizes, or in sheet dimensions different from standard wire mesh. **If your firm only produces engineered wire mesh, please fill out Parts I and V of this questionnaire (skipping Parts II, III, and IV).**

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or

similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

D-GRIDS tool.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is *optional*. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

Item	2019	January-September 2019	January-September 2020
Aggregation of monthly U.S. shipments	0	0	0

RECONCILIATION OF MONTHLY IMPORTS.—Please ensure that the U.S. shipments reported for full year 2019, January to September 2019, and January to September 2020 reported in question II-7 matches the monthly data reported here. If the calculated fields below return values other than zero (i.e., "0"), the data reported must be revised prior to submission to the Commission.

Reconciliation for	2019	January-September 2019	January-September 2020
Aggregated monthly data minus U.S. shipments (II-7), revise if not returning zero ("0")	0	0	0

II-11. **Employment data.**--Report your firm's employment-related data related to the production of wire mesh and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to September periods, calculate similarly and divide by 9.

If your firm had the same number of PRWs in all calendar year and had not experienced any changes in PRWs in the most recent interim period, you would have the same number of PRWs for the interim periods, regardless of whether the interim periods are Jan-Mar (Q1), Jan-June (Q1+Q2), or Jan-Sept (Q1+Q2+Q3)."

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" --Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

Item	Calendar year			January-September

II-12. **Related firms.**--If your firm reported transfers to related firms in question II-7, please identify the firm(s) and indicate the nature of the relationship between your firm and the related firms (e.g., joint venture, wholly owned subsidiary), whether the transfers were priced at market value or by a non-market formula, whether your firm retained marketing rights to all transfers, and whether the related firms also processed inputs from sources other than your firm.

II-13. **Purchases.**--Has your firm purchased wire mesh produced in the United States or in other countries since January 1, 2017? (Do not include imports for which your firm was the importer of record. These should be reported in an importer questionnaire.)

"Purchase" – A transaction to buy product from a U.S. corporate entity such as another U.S. producer, a U.S. distributor, or a U.S. firm that has directly imported the product.

"Import" –A transaction to buy from a foreign supplier where your firm is the importer of record.

Average wire rod days in inventory:^{1 2}					

¹ Days in inventory would generally be calculated by determining inventory turnover ratio (relevant cost divided by average of beginning and ending period inventory amount) and dividing this factor into 365. Since the level of detail available to each company will vary, please use the relevant information most closely associated with wire mesh operations in order to estimate wire rod days in inventory.

² Please briefly describe how wire rod days in inventory, as reported in this table, was estimated:

III-4e. **Wire rod days in inventory.**—continued

Yes	No	<p>If no--If the calculated fields do not show the correct data, please double check the feeder data for data entry errors and revise. Also, check signs accorded to the post operating income line items; the two expense line items should report positive numbers (i.e., expenses are positive and incomes or reversals are negative--instances of the latter should be rare in those lines) while the income line item also in most instances should have its value be a positive number (i.e., income is positive, expenses or reversals are negative). If after reviewing and potentially revising the feeder data your firm has provided, the differences between your records and the calculated fields persist please identify and discuss the differences in the space below.</p>

Provide data as of the end of the specified calendar years.

Note: Total assets should reflect net assets after any accumulated depreciation and allowances deducted.

Total assets should be allocated to the subject products if these assets are also related to other products. Please provide a brief explanation if there are any substantial changes in total asset value during the period; e.g., due to asset write-offs, revaluation, and major purchases.

V-2. **Production, shipment, and inventory data.--Continued**

RECONCILIATION OF SHIPMENTS, PRODUCTION, AND INVENTORY.--Generally, the data reported for the end-of-period inventories (i.e., line L) should be equal to the beginning-of-period inventories (i.e., line B), plus production (i.e., line C), less total shipments (i.e., lines D, F, H, and J). Please ensure that any differences are not due to data entry errors in completing this form, but rather reflect your firm's actual records; and, also provide explanations for any differences (e.g., theft, loss, damage, record systems issues, etc.) if they exist.

¹ Explanation if the calculated fields above are returning values other than zero (i.e., "0") but are nonetheless accurate: _____.					

V-3. **Channels of distribution.--** Report your firm's U.S. shipments of engineered wire mesh by channel of distribution.

RECONCILIATION OF CHANNELS.--Please ensure that the quantities reported for channels of distribution (i.e., lines M and N) in each time period equal the quantity reported for commercial U.S. shipments (i.e., lines D, F, H) in each time period. If the calculated fields below return values other than zero (i.e., "0"), the data reported must be revised prior to submission to the Commission.

V-4. **Employment data.**--Report your firm's employment-related data related to the domestic (U.S.) production of engineered wire mesh and provide an explanation for any trends in these data.

"Production Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above domestic (U.S.) production operations. Do not report employment data for production occurring outside of the United States or employment data for U.S. sales of products manufactured outside the United States.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to September periods, calculate similarly and divide by 9.

If your firm had the same number of PRWs in all calendar years and had not experienced any changes in PRWs in the most recent interim period, you would have the same number of PRWs for the interim periods, regardless of whether the interim periods are Jan-Mar (Q1), Jan-June (Q1+Q2), or Jan-Sept (Q1+Q2+Q3)."

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" --Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

V-5. **Operations on engineered wired mesh.**-- Report the revenue and related cost information requested below on the engineered wire mesh operations of your firm's U.S. establishment(s).¹ Do not report resales of products. Note that internal consumption and transfers to related firms must be valued at fair market value. Input purchases from related suppliers should be consistent with and based on information in the firm's accounting books and records. Provide data for the specified calendar years and interim periods. If your firm was involved in tolling operations (either as the toller or as the tollee), please contact Zahra Bekkal (202-205-2684, Zahra.Bekkal@usitc.gov) before completing this section of the questionnaire.

If your firm does not maintain some or all of the specific asset information necessary to calculate total assets related to operations on engineered wire mesh in the normal course of business, please estimate this information based upon a method (such as production, sales, or costs) that is consistent with relevant cost allocations in table V-5. Provide data as of the end of the specified calendar years. (Note: Total assets should reflect net assets after any accumulated depreciation and allowances deducted. As reported in this table, total assets should be allocated if they are also related to the operations of other products.)
