

Appendix I.

Nutritional Risk Crosswalk

Nutritional Risk Criteria Worksheet for PC[STUDY YEAR]

This form includes the Nutritional Risk information reported for [STATE AGENCY] in PC[PREVIOUS STUDY YEAR]. To update the worksheet for PC[STUDY YEAR], please follow these steps:

- ▶ Review the worksheet to verify all your State agency's codes are included and mapped to the correct FNS Risk Code.
- ▶ Indicate any revisions to the codes by selecting "New Code(s) -- Delete PC[PREVIOUS STUDY YEAR] Code" (meaning the PC[PREVIOUS STUDY YEAR] codes are no longer valid) or "Additional Code(s)" (meaning the PC[PREVIOUS STUDY YEAR] code(s) are still valid, but there are additional codes that map to that particular Nutritional Risk). Please keep in mind that WIC PC data may include certification records from as early as May [YEAR PRIOR TO STUDY YEAR] and that all codes in your data will need to be mapped.
- ▶ Type any edits or new codes in the Revisions/Additions column.
- ▶ Email the completed worksheet to PC[STUDY YEAR]@insightpolicyresearch.com

When adding and changing codes, please remember, **a State agency code cannot correspond to FNS Risk Codes in different categories.** On this form, bold lines separate categories. If your State agency has a code that spans multiple categories, please contact Insight for further instructions.

If you will be submitting data using the **standard FNS Nutritional Risk Codes**, you do not need to complete this worksheet. Please just let us know the data will include the standard FNS Risk Codes.

Note that this year, FNS nutritional risk codes have had decimal place adjustments. For example, previously, the code for "Routinely using nursing bottles or cups improperly" was 411.2, whereas this year, that number is displayed as 411.02. All decimal numbers less than 10 have been adjusted in this way to allow for differentiation between codes ".01" and ".10" in Microsoft Excel. If your code is identical to the FNS nutritional risk code, then your code has been adjusted as well, and there is no need to make further adjustments.

This information is being collected from State agencies to enable the Food and Nutrition Service (FNS) to prepare biennial reports on WIC participant and program characteristics. This is a mandatory collection authorized under 7 CFR §246.25(b) (3). FNS uses the data from these reports to estimate budgets, submit civil rights reporting, identify needs for research, and to develop and review WIC policies and procedures. Under the Privacy Act of 1974 and the System of Record Notice FNS-8 USDA/FNS Studies and Reports, any personally identifying information obtained will be kept private to the extent of the law. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0584-0609. The time required to complete this information collection is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Agriculture, Food and Nutrition Services, Office of Policy Support, 3101 Park Center Drive, Room 1014, Alexandria, VA 22302, ATTN: PRA (0584-0609). Do not return the completed form to this address.*
