Steel Import License Application

Product Information for Each Product*

HTS Number: Harmonized Tariff Schedule (HTS) number that most closely describes the product to be imported. This should match the HTS used on the CF-7501.

Country of Melt & Pour: Country where Steel was originally smelted; Please spell out Country name (no abbreviations).

Country of melt and pour refers to the original location where the raw steel is (1) first produced in a steel-making furnace in a liquid state and then (2) poured into its first solid shape. The first solid state can take the form of either a semi-finished product (slab, billets or ingots) or a finished steel mill product. The location of melt and pour is customarily identified on mill test certificates that are commonplace in steel production, generated at each stage of the production process, and maintained in the ordinary course of business. This reporting requirement will not apply to raw materials used in the steel manufacturing process (*i.e.*, steel scrap; iron ore; pig iron; reduced, processed, or pelletized iron ore; or raw alloys).

Product Description: Description of the product taken from the HTS list.

Remedy Category: Category assigned to the product based on the Product HTS. (Not required)

Volume (Quantity): The weight of the product in *kilograms* at time of entry (net weight).

Unit: The unit of measurement must be listed in kilograms.

Customs Value (U.S.\$): Entered value of this product in U.S. dollars; not invoiced value (It should not include duty, brokerage fees, or freight).
