

**U.S. Department of Commerce  
International Trade Administration  
Steel Import License  
OMB Control No. 0625-0245**

**Justification of Supplementary Information**

The Supplementary Information section of ROCIS is being updated with a draft copy of the Final Rule for the Steel Import License collection. The final rule was sent to Leg & Reg for their review to Friday, June 12, 2020, by the ITA program office. Also, the program office has updated the definition for “Country of Melt & Pour” to page 2 of the Steel Import License Application Instruction page. Therefore, we are uploading a copy of the draft rule and updated application with instructions to accompany the nonsubstantive change to the currently approved collection request.
