Coral reefs protect the USVI from coastal erosion and natural disasters. Coral reefs are only important to fishermen, divers and snorkelers. Coral reefs in good condition provide food for island communities to eat Coral reefs are important to my island's culture.

ATTITUDES TOWARDS CORAL REEF MANAGEMENT STRATEGIES AND ENFORCEMENT

13. A Marine Protected Area is an area of the ocean where human activity is typically restricted to protect living, non-living, cultural, and/or historic resources such as conservation areas and sanctuaries. How familiar are you with Marine Protected Areas (MPAs)?

	St ro ng ly Di sa gr ee	D i s a g r e e	Neith er Agre e nor Disa gree	A g r e e	St ro ng ly A gr ee	N ot S ur e
MPAs protect coral reefs						
MPAs increase the number of fish						
There should be fewer locally-managed MPAs in the USVI						
There should be more locally-managed MPAs in the USVI						
There has been economic benefit to the USVI from the establishment of locally-managed MPAs						
Fishermen's livelihoods have been negatively impacted from the establishment of locally-managed MPAs in the USVI						
Locally managed MPAs help increase tourism in the USVI						
The establishment of locally-managed MPAs increases the likelihood that people will vacation in the USVI						
I would support adding new locally managed MPAs in the USVI if there is evidence that the ones we have are improving the USVI's marine resources						
I generally support the establishment of locally-						

managed MPAs
