H. Item 3. Particulars

Column A - Interstate Access. The dollar amounts in column A should equal the sum of the dollar amounts in columns B through F for both the current year and cumulative periods. Likewise, the rates of return in column A shall equal the weighted average of the rates of return in columns B through F.

Line 1 - Total Revenues - (earned during the report period) shall include service revenues, interest during construction, if applicable, and miscellaneous operating revenues less uncollectibles.

Line 2 - Total Expenses and Taxes - shall include operating expenses, depreciation, amortization, other expenses, interstate allowances and disallowances if applicable, as well as all taxes.

It shall also include interstate rate base allowances and disallowances, if applicable. The method for calculating Rate Base (Average Net Investment) shall be in accordance with the ARMIS Order, CC Docket 86-182, released July 20, 1990.

1. FCC Ordered Refund Total _____
2. Refund for Period (Amortized) _____
3. Tax Rate _____
4. Refund Adjusted for Taxes _____
(Line 2 times (1 minus Line 3)) (Enter this amount)

I. Item 4 - Rates of Return for the Switched Traffic Sensitive Category should be calculated and entered in item 4 on the form. Switched traffic sensitive consists of line termination, local switching, intercept, information and local transport. End office includes line termination, local switching and intercept. For reporting purposes, equal access implementation costs should be included within "end office."

J. Item 5 - Multiplicative Factor for Cumulative Measurement - rates of return for the cumulative measurement period shall be annualized with the appropriate multiplicative factor and shown in item 5.

K. Item 6 - Total Out-of-Period Adjustment. Report total out-of-period adjustments for the cumulative period in item 6. Significant out-of-period adjustments should be footnoted and explained in the Remarks section below. Significant out-of-period adjustments are those adjustments having an annualized 10 basis points or more impact within the three enforcement categories (common line, special access, switched traffic sensitive). In connection with the 10 basis point threshold, carriers need only report retroactive adjustments above the following amounts: \$1,000,000 for common line revenues; \$300,000 for special access revenues; and \$300,000 for switched traffic sensitive categories.

Out-of-period adjustments from prior enforcement periods identified more than nine months after the prior enforcement periods have ended should be shown separately in the Remarks section if (1) a company's rate of return for an enforcement category was within 10 basis points of a refund situation and (2) will cause the prior rate of return to go above its allowed maximum. In each case, the appropriate enforcement periods should be clearly indicated.
