

twist ties from China are materially injuring, or threatening material injury to, a U.S. industry.³⁰ A negative ITC determination will result in the investigation being terminated.³¹ Otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). Section 351.301(b) of Commerce's regulations requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted³² and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.³³ Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Interested parties should review the regulations prior to submitting factual information in this investigation.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by Commerce. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301.³⁴ For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, Commerce may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, Commerce will inform

parties in a letter or memorandum of the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Parties should review *Extension of Time Limits; Final Rule*, 78 FR 57790 (September 20, 2013), available at <http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm>, prior to submitting extension requests or factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.³⁵ Parties must use the certification formats provided in 19 CFR 351.303(g).³⁶ Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, Commerce published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures*, 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (e.g., the filing of letters of appearance as discussed at 19 CFR 351.103(d)). Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.³⁷

This notice is issued and published pursuant to sections 702(c)(2) and 777(i) of the Act, and 19 CFR 351.203(c).

Dated: July 16, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix—Scope of the Investigation

The merchandise covered by this investigation consists of twist ties, which are

³⁵ See section 782(b) of the Act.

³⁶ See *Certification of Factual Information to Import Administration During Antidumping and Countervailing Duty Proceedings*, 78 FR 42678 (July 17, 2013) (*Final Rule*); see also frequently asked questions regarding the *Final Rule*, available at http://enforcement.trade.gov/lei/notices/factual_info_final_rule_FAQ_07172013.pdf.

thin, bendable ties for closing containers, such as bags, bundle items, or identifying objects. A twist tie in most circumstances is comprised of one or more metal wires encased in a covering material, which allows the tie to retain its shape and bind against itself. However, it is possible to make a twist tie with plastic and no metal wires. The metal wire that is generally used in a twist tie is stainless or galvanized steel and typically measures between the gauges of 19 (.0410" diameter) and 31 (.0132") (American Standard Wire Gauge). A twist tie usually has a width between .075" and 1" in the cross-machine direction (width of the tie—measurement perpendicular with the wire); a thickness between .015" and .045" over the wire; and a thickness between .002" and .020" in areas without wire. The scope includes an all-plastic twist tie containing a plastic core as well as a plastic covering (the wing) over the core, just like paper and/or plastic in a metal tie. An all-plastic twist tie (without metal wire) would be of the same measurements as a twist tie containing one or more metal wires. Twist ties are commonly available individually in pre-cut lengths ("singles"), wound in large spools to be cut later by machine or hand, or in perforated sheets of spooled or single twist ties that are later slit by machine or by hand ("gangs").

The covering material of a twist tie may be paper (metallic or plain), or plastic, and can be dyed in a variety of colors with or without printing. A twist tie may have the same covering material on both sides or one side of paper and one side of plastic. When comprised of two sides of paper, the paper material is bound together with an adhesive or plastic. A twist tie may also have a tag or label attached to it or a pre-applied adhesive attached to it.

Twist ties are imported into the United States under Harmonized Tariff Schedule of the United States (HTSUS) subheadings 8309.90.0000 and 5609.00.3000. Subject merchandise may also enter under HTSUS subheadings 3920.51.5000, 3923.90.0080, 3926.90.9990, 4811.59.6000, 4821.10.2000, 4821.10.4000, 4821.90.2000, 4821.90.4000, and 4823.90.8600. These HTSUS subheadings are provided for reference only. The written description of the scope of the investigation is dispositive.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Reporting Requirements for the Ocean Salmon Fishery Off the Coasts of Washington, Oregon, and California

The Department of Commerce will submit the following information

³⁰ See section 703(a)(1) of the Act.

³¹ *Id.*

³² See 19 CFR 351.301(b).

³³ See 19 CFR 351.301(b)(2).

³⁴ See 19 CFR 351.302.

collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on March 27, 2020, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA).
Title: Emergency Commercial Salmon Landing Report.

OMB Control Number: 0648–0433.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 40.

Average Hours per Response: 15 minutes.

Total Annual Burden Hours: 10 hours.

Needs and Uses: Ocean salmon fisheries conducted in the U.S. exclusive economic zone, 3–200 nautical miles off the West Coast states of Washington, Oregon, and California, are managed by the Pacific Fishery Management Council (Council) and NOAA's National Marine Fisheries Service (NMFS) under the Magnuson Stevens Fishery Conservation and Management Act (MSA). Management measures for the ocean salmon fisheries are set annually, consistent with the Council's Pacific Coast Salmon Fishery Management Plan (FMP). The FMP provides a framework for managing the ocean salmon fisheries in a sustainable manner, as required under the MSA, through the use of conservation objectives, annual catch limits, and other reference points and status determination criteria described in the FMP. To meet these criteria, annual management measures, published in the **Federal Register** by NMFS, specify regulatory areas, catch restrictions, and landing restrictions based on the stock abundance forecasts. These catch and landing restrictions include area- and species-specific quotas for the commercial ocean salmon fishery, and generally require landings to be reported to the appropriate state agencies to allow for a timely and accurate accounting of the season's catch (50 CFR 660.404 and 50 CFR 660.408(o)). The best available catch and effort data and projections are presented by the state

fishery managers in telephone conference calls involving the NMFS West Coast Regional Administrator and representatives of the Council. However, NMFS acknowledges that unsafe weather or mechanical problems could prevent commercial fishermen from making their landings at the times and places specified, and the MSA requires conservation and management measures to promote the safety of human life at sea. Therefore, the annual management measures will include provisions to exempt commercial salmon fishermen from compliance with the landing requirements when they experience unsafe weather conditions or mechanical problems at sea, so long as the appropriate notifications are made by, for example, at-sea radio and cellular telephone, and information on catch and other required information is given, under this collection of information. The annual management measures will specify the contents and procedure of the notifications, and the entities receiving the notifications (*e.g.*, U.S. Coast Guard). Absent this requirement by the Council, the state reporting systems would not regularly collect this specific type of in-season radio report. These provisions, and this federal collection of information, promote safety at sea and provide practical utility for sustainably managing the fishery, and ensure regulatory consistency across each state by implementing the same requirements in the territorial waters off each state. This information collection is intended to be general in scope by leaving the specifics of the notifications for annual determination, thus providing flexibility in responding to salmon management concerns in any given year.

Affected Public: Business or other for-profit organizations (specifically, commercial salmon fishermen).

Frequency: Reporting under this emergency provision is infrequent.

Respondent's Obligation: Mandatory in order to deviate from landing requirements due to unsafe weather or mechanical problems.

Legal Authority: 16 U.S.C. 1801 *et seq.*
This information collection request may be viewed at www.reginfo.gov.

Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day

Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0433.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA305]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; applications for 17 permit renewals, 1 permit modification, and 2 new permits.

SUMMARY: Notice is hereby given that NMFS has received 20 scientific research permit application requests relating to Pacific salmon and steelhead, eulachon, and green sturgeon. The proposed research is intended to increase knowledge of species listed under the Endangered Species Act (ESA) and to help guide management and conservation efforts. The applications may be viewed online at: https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.

DATES: Comments or requests for a public hearing on the applications must be received at the appropriate address (see **ADDRESSES**) no later than 5 p.m. Pacific Standard Time on August 26, 2020.

ADDRESSES: Because all West Coast NMFS offices are currently closed, all written comments on the applications should be sent in by email to nmfs.wcr-apps@noaa.gov (please include the permit number in the subject line of the email).

FOR FURTHER INFORMATION CONTACT: Rob Clapp, Portland, OR (ph.: 503–231–2314), email: Robert.Clapp@noaa.gov. Permit application instructions are available from the address above, or online at <https://apps.nmfs.noaa.gov>.

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): Threatened Lower
