

SUPPORTING STATEMENT - PART A

EXCEPTIONAL FAMILY MEMBER PROGRAM; DD Form 2792, DD Form 2792-1; OMB
Control Number 0704-0411

Summary of Changes from Previously Approved Collection

- Burden increased due to a general increase in the number of family members filling out both forms.
- Removed all requirements and references to Social Security Numbers; the Sponsor's DoD ID number was included as a replacement throughout the DD Forms 2792 and 2792-1.

1. Need for the Information Collection

The Individuals with Disabilities Education Act, (Sections 1400 et seq. of title 20, United States Code) and the Defense Dependents Education Act, (Sections 921 et seq. of title 20, United States Code) require the Department of Defense to provide early intervention services to developmentally delayed infants and toddlers (birth through 2) and special education and medically related services to children with disabilities from 3 through 21 years of age who are eligible to attend a DoD school. In order to ensure the availability of necessary medical and educational services for family members, the Department must identify those who have special health or educational needs. Medical and educational needs are also considered when approving family travel to an overseas or remote location where DoD must provide the services.

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 (Public Law 94-191) requires specific language to advise the individuals that personally identifiable health information shall not be used or disclosed except for specifically permitted purposes, unless informed consent is provided by the individual. The Department is standardizing the information collection to ensure that appropriate information is collected and that it meets the data collection HIPAA requirements.

The National Defense Authorization Act (NDAA) for Fiscal Year 2010 (Public Law 111-84) requires procedures to identify members of the Uniformed Services who are members of military families with special needs, mechanisms to ensure their timely and accurate evaluations and enrollment.

2. Use of the Information

The purpose of this information collection is to 1) enroll sponsors into the Exceptional Family Member Program (EFMP), 2) match the special needs of family members against the availability of medical and educational services through the Family Member Travel Screening (FMTS) process, and 3) advise civilian employees about the availability of

medical and educational services to meet the special needs of their family members. Respondents are Military members and DoD civilian employees, private physicians and school personnel. Respondents may access these information collection instruments online, or through paper copies provided to them. Similarly, the information collection instruments may be completed either by hand or digitally and returned via secure digital exchange or in-person using a paper copy of the information collection instruments.

This information collection is primarily used by the Uniformed Services to enroll family members who meet the criteria for special medical and educational needs into the EFMP as well as identifying individuals requiring special consideration when authorizing family travel to an overseas or remote location at government expense. The DD Form 2792, "Family Member Medical Summary," and DD Form 2792-1, "Special Education/Early Intervention Summary," are the forms associated with this information collection. The information is provided to both medical and educational screening personnel in overseas and remote locations for their determination of the availability of medical and education resources necessary to meet the family member's needs. The medical and/or educational recommendation is supplied to the appropriate Military Department's personnel department in determining the future assignment for the service member. This information collection may also be used to identify available medical and educational resources to DoD civilian employees who are considering a job overseas to assist them in deciding whether to relocate overseas with a family member who has special medical or educational needs. The information is not supplied to agencies outside of the Department of Defense. Respondents are required to update the forms every 3 years, and communication from the Military Departments may be sent to the respondent requesting an update to the information collection.

3. Use of Information Technology

The DD Form 2792 and DD Form 2792-1 are available to the public electronically online from the Department of Defense forms website (https://www.esd.whs.mil/Directives/forms/dd2500_2999/). The current electronic response rate is 30%. For respondents who have access to computerized information technology, the forms can be completed online and electronically signed using a Common Access Card (CAC). There are no current plans to submit the completed forms electronically due to the number of individuals who must sign the form (sponsor or family member, civilian physician and/or public school officials). Although the Department has electronically generated the form, the form includes confidential medical information that must be entered by a physician. At this time, it is not practical to require that this information be entered electronically.

4. Non-duplication

Investigation resulted in no findings of duplicate records. The information collection is not available in any centralized location and requires the assistance of military personnel and DoD civilian employees in providing information. Each form contains unique and original information that pertains only to the medical and educational needs of an individual family

member. The information obtained through this collection is unique and is not already available for use or adaptation from another cleared source.

5. Burden on Small Businesses

This information collection does not impose a significant economic impact on a substantial number of small businesses or entities.

6. Less Frequent Collection

If this information is not collected it will be impossible for the Military Departments to consider the special medical and/or educational needs of family members when approving overseas travel, nor would it be possible to inform civilian employees of the availability of services overseas. If the information is collected less often, it may be inaccurate. This could result in an incorrect decision about assignment and thus a lack of adequate resources to meet the family member's medical and/or educational needs. The Department would incur significant costs if family members are returned to the United States from an overseas location due to non-existent or insufficient medical support being available. In addition, families would not be enrolled into the program in a consistent manner.

7. Paperwork Reduction Act Guidelines

There are no special circumstances. This collection of information does not require collection to be conducted in a manner inconsistent with the guidelines delineated in 5 CFR 1320.5(d)(2).

8. Consultation and Public Comments

Part A: PUBLIC NOTICE

A 60-Day Federal Register Notice for the collection published on Wednesday October 24, 2018. The 60-Day FRN citation is 83 FR 53615.

A 30-Day Federal Register Notice for the collection published on Friday May 1, 2020. The 30-Day FRN citation is 85 FRN 25408.

Part B: CONSULTATION

In preparation for the current submission, the program analyst responsible for EFMP policy from the Office of the Secretary of Defense convened a working group of the EFMP Managers from each Service to review the DD Forms 2792 and 2792-1. The group concurred that the requirement should remain for the collection of information at least every 3 years.

9. Gifts or Payment

No payments or gifts are being offered to respondents as an incentive to participate in the collection.

10. Confidentiality

All data are protected by the Privacy Act of 1974 and are protected according to the regulations therein, and by related DoD directives and instructions. The Privacy Impact Assessment (PIA) is not applicable. The following System of Records Notices (SORNs) oversee the collection of the SSN. Completed forms are covered by official military personnel and special needs records. SORNs are maintained by each of the Services. 11. Sensitive Questions

All of the information on DD Form 2792 and DD Form 2792-1 is considered sensitive. The forms collect information about family members and their medical or educational needs.

The purpose of the forms, however, requires that such information be collected so that the medical and educational needs can be met in the location they reside.

The DD Forms 2792 and 2792-1 are used to help match the needs of family members with the locations where their special needs can be met. Complete information increases the likelihood that the recommendation will accurately reflect the needs.

In considering the health and safety of these family members, decisions are made on an individual basis, not solely on a diagnosis. Gender provides additional information that is relevant to medical care. There is increased prevalence and severity of certain conditions that have a gender basis. There are chromosomal conditions that have gender differences regarding prognosis and types of care. There are gender differences in medication management.

In the special needs population, there are developmental issues that present differently depending on gender, especially in early intervention and preschool-aged populations.

Gender provides necessary information that helps to clarify the interventions and supports necessary to manage certain conditions and diseases.

15. Reasons for Change in Burden

The burden has increased since the previous approval due to the fact that the numbers of family members identified with special needs has risen and is expected to rise minimally over the next three years. Additionally, the total dollar amount reflects the increased use of non-military physicians and non-governmental school personnel to complete the forms.

The results of this information collection will not be published.

17. Non-Display of OMB Expiration Date

We are not seeking approval to omit the display of the expiration date of the OMB approval on the collection instrument.
