Abstract: Lessees and pipeline ROW holders design the pipelines that they install, maintain, and operate. To ensure those activities are performed in a safe manner, BSEE needs information concerning the proposed pipeline and safety equipment, inspections and tests, and natural and manmade hazards near the proposed pipeline route. BSEE uses the information to review pipeline designs prior to approving an application for an ROW or lease term pipeline to ensure that the pipeline, as constructed, will provide for safe transportation of minerals through the submerged lands of the OCS. BSEE reviews proposed pipeline routes to ensure that the pipelines would not conflict with any State requirements or unduly interfere with other OCS activities. BSEE reviews proposals for taking pipeline safety equipment out of service to ensure alternate measures are used that will properly provide for the safety of the pipeline and associated facilities (platform, etc.). BSEE reviews

notifications of relinquishment of ROW grants and requests to decommission pipelines for regulatory compliance and to ensure that all legal obligations are met. BSEE monitors the records concerning pipeline inspections and tests to ensure safety of operations and protection of the environment and to schedule witnessing trips and inspections. Information is also necessary to determine the point at which DOI or Department of Transportation (DOT) has regulatory responsibility for a pipeline and to be informed of the identified operator if not the same as the pipeline ROW holder.

Title of Collection: 30 CFR 250, Subpart J, Pipelines and Pipeline Rights-of-Way (ROW).

OMB Control Number: 1014-0016.

Form Number: Forms BSEE-0149—Assignment of Federal OCS Pipeline Right-of-Way Grant, and Form BSEE-0135—Identification of Right-of-Way Pipeline Operator.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public:

Potential respondents include Federal OCS oil, gas, and sulfur lessees and/or operators and holders of pipeline rights-of-way.

Total Estimated Number of Annual Responses: Currently there are approximately 60 Oil and Gas Drilling and Production Operators in the OCS. Not all the potential respondents will submit information at any given time, and some may submit multiple times.

Total Estimated Number of Annual Responses: 2,961.

Estimated Completion Time per Response: Varies from .5 hour to 107 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 34,560.

Respondent's Obligation: Most responses are mandatory, while others are required to obtain or retain benefits, or voluntary.

Frequency of Collection: Submissions are generally on occasion and varies by section.

Total Estimated Annual Nonhour Burden Cost: \$1,379,369.

An agency may not conduct, or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).
