Abstract: The Energy Policy Act of 2005 authorizes the Secretary of the Interior to provide assistance to Indian Tribes and Tribal energy resource development organizations for energy development and appropriates funds for such projects on a year-to-year basis. See 25 U.S.C. 3502. When funding is available, the Office of Indian Energy and Economic Development (IEED) may solicit proposals for projects for building capacity for Tribal energy resource development on Indian land from Tribal energy resource development organizations and Indian Tribes, including Alaska Native regional and village corporations under the TEDC program. For the purposes of this program, “Indian land” includes: All land within the boundaries of an Indian reservation, pueblo, or rancheria; any

land outside those boundaries that is held by the United States in trust for a Tribe or individual Indian or by a Tribe or individual Indian with restrictions on alienation; and land owned by an Alaska Native regional or village corporation.

Those who would like to submit a TEDC project proposal must submit an application that includes certain information and, once funding is received must submit reports on how they are using the funding. A complete application must contain the following:

- A formal signed resolution of the governing body of the Tribe or Tribal energy resource development organization demonstrating authority to apply;
- A proposal describing the planned activities and deliverable products; and
- A detailed budget estimate, including contracted personnel costs, travel estimates, data collection and analysis costs, and other expenses.

The project proposal must include the information about the Tribe or Tribal energy resource development organization sufficient to allow IEED to evaluate the proposal based on the following criteria:

- (a) Energy resource potential;
- (b) Applicant's energy resource development history and current status;
- (c) Applicant's existing energy resource development capabilities;
- (d) Demonstrated willingness of the applicant to establish and maintain an independent energy resource development business entity;
- (e) Intent to develop and retain energy development capacity within the applicant's government or business entities; and
- (f) Applicant commitment of staff, training, or monetary resources.

The IEED requires this information to ensure that it provides funding only to those projects that meet the goals of the TEDC and the purposes for which Congress provides the appropriations.
