The Office of Workers’ Compensation Programs (OWCP) is the agency responsible for administration of the Federal Employees’ Compensation Act (FECA), 5 U.S.C. 8101 *et seq.*, the Black Lung Benefits Act (BLBA), 30 U.S.C. 901 *et seq.*, and the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA), 42 U.S.C. 7384 *et seq.* These statutes require OWCP to pay for appropriate medical and vocational rehabilitation services provided to beneficiaries. In order for OWCP’s billing contractor to pay providers of these services with its automated bill processing system, providers must “enroll” with one or more of the OWCP programs that administer the statutes by submitting certain profile information, including identifying information, tax I.D. information, and whether they possess specialty or sub-specialty training. Form OWCP–1168 is used to obtain this information from each provider. This ICR will be submitted to OMB as a follow-up to an emergency processing request that was submitted to OMB on February 14, 2020 which will allow for implementation of the revised form as soon as possible. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on February 26, 2019 (85 FR 11119).

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines. Under Title 30 of the Code of Federal Regulations (CFR), MSHA has requirements that address hoists and appurtenances, including wire rope, used for hoisting persons. The requirements address both metal and nonmetal surface and underground mines (30 CFR parts 56 and 57); and underground coal and surface work areas of underground coal mines (30 CFR parts 75 and 77). Sections 56/57.19022 and 75/77.1432 requires the diameter of newly installed wire rope to be measured at least once in every third interval of the rope's active length to establish a baseline for subsequent semiannual measurements. A record of the measurements is required to be made and retained until the rope is retired from service. Sections 56/57.19023 and 75/77.1433 require the wire rope to be visually examined at least every fourteen days for visible structural damage, corrosion, and improper lubrication or dressing. If the examination reveals weakening portions of the rope, the weakened portions must be monitored daily for further deterioration until retirement criteria require that the rope be removed from service. The person conducting the examination must certify that the examination was made and the record must be retained for one year. Sections 56/57.19121 requires the person conducting the inspection, test or examination of hoisting equipment certify that these activities have been done. Any unsafe conditions must be noted in a record and dated. All certifications and records must be retained for one year. Section 75.1400-2 requires a record to be made of tests conducted on safety catches. Safety catches are the last means to stop, safely, a falling conveyance in the event of rope or equipment failure. Sections 75.1400-4 and 77.1404 require a record to be made of each daily examination.

If any unsafe condition is found during the examination, the person conducting the examination must make a record of the condition. All certifications and records must be retained for one year. Section 77.1906 requires a daily examination of hoists used for shaft sinking. If any unsafe condition is found during the examination, the person conducting the examination must make a record of the condition. All certifications and records must be retained for one year.
