A. School Operations

Definitions for this section

Hybrid in-person and remote instruction occurs when groups of students receive a mix of in-person, in school instruction and remote instruction on alternating days or weeks.

Most students refers to the largest percentage of students.

Remote instruction is a method of instruction in which teachers and students are in different locations and interact through internet-based or non-internet-based mechanisms. It may include both synchronous (simultaneous, such as in a videoconference or a teleconference) and asynchronous (non-simultaneous, such as via email or paper packets) interaction.

These definitions also are available to respondents by hovering over the words that appear in blue text in the survey.

This section asks how your school is operating in terms of in-person or remote instruction during the 2020–21 school year.

1. During the first **4 weeks of the 2020–21 school year (i.e., fall semester)**, what type of instruction did MOST students receive from your school? *(Select one response.)*
