

**Justification for Nonmaterial/Non-substantive Change for
OMB Control Number 2126-0006 IC**

Medical Qualification Requirements

This justification for a nonmaterial/non-substantive change is to request the Office of Management and Budget’s (OMB) approval for a non-substantive change to the Federal Motor Carrier Safety Administration’s (FMCSA) Information Collection (IC) titled *Medical Qualification Requirements*, covered by OMB Control Number 2126-0006. This IC currently contains all information collection requirements for interstate commercial motor vehicle (CMV) drivers, Medical Examiners (MEs) conducting medical examinations of CMV drivers, and motor carriers that are subject to 49 CFR part 391, including the use of certain forms to record medical examinations of CMV drivers, results of medical examinations conducted, and driver qualification decisions. Forms required in 49 CFR part 391 include the Medical Examination Report (MER) Form, MCSA-5875, CMV Driver Medical Examination Results Form, MCSA-5850 (electronic only), and the Medical Examiner’s Certificate (MEC), Form MCSA-5876. FMCSA is requesting an expedited review and approval of this ICR to update the attached form that is included as in 49 CFR 391 as part of the medical certification process for interstate CMV drivers. The requested update is detailed below.

Changes to the MER Form, MCSA-5875

In 49 CFR 391.43(f), FMCSA is making the changes reflected in the table below, most of which are de minimus changes, to the Medical Examination Report Form, MCSA-5875, in an effort to improve clarity and accuracy. In addition to the changes in the table below, the font used for the pages containing the Instructions for Completing the Medical Examination Report Form (MCSA-5875) was changed to be consistent with the form. The public will be provided sufficient time to make any necessary information technology (IT) changes before use of the revised form becomes effective.
