The time required to complete this information collection is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

INSTRUCTIONS:

- Report for all land operated, including land rented from others, in National.
- Report for all seasons (winter, spring, summer, and fall) during 2020.
- **Fresh Market and Processing Descriptions:**
 - **Processing** refers to processes that alter the general state of the commodity, such as canning, cooking, freezing, dehydration, milling, grinding, pasteurization, pickling, juicing, or slicing. The Processing Price should be the total dollars received or average price per unit sold and should reflect all payments to growers plus the costs of materials and services provided by processors to get the raw commodity to the plant receiving door.
 - **Fresh market** refers to utilized production that is not processed. The Fresh Market Price should be the total dollars received or average price per unit sold and should reflect an F.O.B. (Freight on Board) shipping point price, or equivalent, for all grades and qualities sold for fresh market. The F.O.B. shipping point is a point of first sale. Equivalent points of first sale include farm, roadside, farmer's market, grower auction, and U-pick sales. Adjust sales at wholesale terminal markets for freight, brokerage, and commission charge paid by the grower.
