Study Title: Teaching Health Center Graduate Medical Education (THCGME) Cost Evaluation

Re: Determination of Not Research

Regarding the Determination Worksheet submitted for the project entitled, "*Teaching Health Center Graduate Medical Education (THCGME) Cost Evaluation*," a determination has been made that this project does not meet the definition of research. That is, a systematic investigation designed to contribute to generalizable knowledge.

This determination is being made because this study is purely an evaluation of the Teaching Health Center Graduate Medical Education program, which is a unique program. The purpose of the study is to specifically inform the THCGME program. Per the PI, although results of the evaluation may be published, there is no intention to contribute to knowledge outside of this research context.

Further review by the GW IRB is not required.

Should your study change in such a way that it does meet the definition of human subjects research, please contact the Office of Human Research before proceeding.
