<u>Instructions: Voluntary Conversions Addendum (HUD-52860-E):</u>

PHAs applying for Section 22 Voluntary Conversion are required to complete this Addendum (HUD-52860-E) as part of their Inventory Removal Application (HUD-52860) and submit it (as an attachment) with their application.

A PHA submitting an application for Voluntary Conversion must fulfill two primary requirements: (1) perform a conversion assessment in accordance with 24 CFR 972.218 - 24 CFR 972.224 ("Conversion Assessment"); and (2) prepare a conversion plan in accordance with 24 CFR 972.227- 24 CFR.233 within one year of performing the Conversion Assessment ("Voluntary Conversion Plan"). Both the Conversion Assessment and Voluntary Conversion Plan must be approved by HUD as part of the PHA's Plan. HUD will not accept any application for Voluntary Conversion until the PHA has completed a Conversion Assessment and Voluntary Conversion Plan; and included them in its PHA Plan.

Item 1: Voluntary Conversions are permitted only if they are cost-effective. The cost methodology that PHAs must use to compare the costs of continuing to operate a development as public housing for the remainder of its useful life to the cost of providing tenant-based Housing Choice Voucher Assistance to the residents of that development was published as a final rule on March 21, 2006 (Appendix to 24 CFR part 972) ("Conversion Calculation Rule"). In order to assist PHAs in completing the calculations and comparisons required by the Rule, a downloadable spreadsheet calculator is available on the HUD website. HUD will look for completed cost calculations in reviewing the PHA's cost comparison of providing tenant-based Housing Choice Voucher Assistance with the cost of operating the development as public housing. Note: The cost methodology for Required Conversion is different from that for Voluntary Conversion. When comparing the cost of tenant-based Housing Choice Voucher Assistance versus public housing, PHAs should consider, as essential, the length of the remaining useful life for the public housing development that may be a 20 or 30-year period. (Typically, a 40-year period is used when rehabilitation is performed equal to new construction. A 30-year period is used when a PHA plans a modernization effort that addresses all backlog needs, any redesign that is necessary to keep a property viable and cost-effective for an ongoing useful life in accordance with the useful life of the building and its systems.) PHAs must use this calculation tool (spreadsheet) to compute the PHAs information on the development's operating, modernization, and accrual costs, as well as information on voucher costs for Voluntary Conversion.

PHAs must have an appraisal performed for the "Highest and Best Use" (as a commercial or residential use) value or potential market value of the public housing development and whether any residual value may be generated from the sale of the development or the land (after demolition). The information from this appraisal is required to complete the HUD Cost Analysis. Specifically, the value that must be inserted into Section 5(c) of the Cost Analysis Spreadsheet Calculator is the "Highest and Best Use" value or ("Market Value") (See applicable HUD Notice on appraisal guidelines for Voluntary Conversions).

Item 2: "Public Housing" means low-income housing, and all necessary appurtenances thereto, assisted under the 1937 Act, other than assistance under Section 8 of the 1937 Act. "Other Assisted Housing" is housing with some form of non-public housing subsidy provided for under the 1937 Act. "Rent-Controlled or Rent-Capped Housing" has no subsidy, but provides for a rental cap such as with property with rent controls consistent with state regulated Low Income Housing Tax Credits or other statutory or regulatory cap such as rent control. The income levels of

tenants in such properties may be regulated or limited by state or local regulations. "Market Rate Housing" has no restrictions on rental rates, operating costs, profits, rental rate increases, or improvements that can be made to the property. "Other Housing" is housing that does not fall into the options above but may include other subsidized housing (e.g., state subsidized housing, rural development agency), or other sources. In the narrative describing the intended future use for the development, PHAs must provide details of their specific plans for the public housing development after conversion (e.g., whether the property will be demolished, disposed of for other housing, retained and utilized to house low-income residents, etc.). The narrative should provide credible evidence of the capacity and capability of the PHA and its partners, if applicable, to complete the proposed future use of the property, especially in case where the PHA sells its property for Fair Market Value (FMV) and receives significant sales proceeds, or a PHA leases or sells its property for less than FMV and collaborates with a joint venture partner to develop other types of low-income housing or housing for low-income families.

Items 3 and 4: Refer to PIH Notice 2014-14 (or any replacement notice) for additional guidance.
