

FCC FORM 1205 INSTRUCTIONS FOR DETERMINING COSTS OF REGULATED CABLE EQUIPMENT AND INSTALLATION

"Equipment Form"

Purpose of this Form

This FCC Form 1205 and the accompanying instructions take you step-by-step through the calculations needed to determine the costs associated with regulated equipment and installation for the basic service tier. Under the rules of the Federal Communications Commission (the "FCC" or "Commission"), the actual cost of regulated equipment and installations plus a reasonable profit must be separated, or "unbundled," from your maximum permitted rates for regulated cable services.¹

The Commission's rules define equipment and installation for the basic service tier as any customer equipment and installation that is used to receive the basic service tier, even if that equipment is also used to receive cable programming service tiers (that is, non-basic services that are not offered on a per-channel or pay-per-view basis) or unregulated services such as pay-per-channel or pay-per-view programming. Local franchise authorities (or the Commission where it is certified to regulate basic tier services) will review the rates for regulated equipment and installations. The Commission will review appeals of local franchising authority decisions concerning these rates.

The FCC is charged with reviewing complaints concerning charges for equipment and installation used to receive cable programming services. Commission rules define equipment and installation used to receive cable programming services as all equipment and installation on a subscriber's premises that is used to receive either: (1) exclusively cable programming services; or (2) both cable programming services and pay-per-channel or pay-per-view programming. The Commission will accept petitions for Commission review of the costs and rates associated with such equipment and installation on a case-by-case basis in accordance with its rules.

Filing Instructions

- If you are filing an FCC Form 1200 (Setting Maximum Initial Permitted Rates for Regulated Cable Services Pursuant to Rules Adopted February 22, 1994 -- "First-Time Filers Form") with either your local franchising authority or with the FCC, then you must attach at least one completed FCC Form 1205 to that form. The calculations made in the Form(s) 1205 will be used to establish equipment and installation costs that you are required to separate out in the determination of initial rates for regulated cable services. See the instructions for Form 1200 concerning your options as to how to separate out equipment and installation costs.
- If you are filing an FCC Form 1220 (Cost of Service Filing for Regulated Cable Services) or an FCC Form 1225 (Cost of Service Filing for Regulated Cable Services for Small Systems²) with either your local franchising authority or with the FCC, then you must attach at least one completed FCC Form 1205 to that form. The calculations made in the Form 1205 will be used to establish equipment and installation costs that you are required to separate out in the determination of initial permitted rates for regulated cable services. Eligible small systems may use Form 1225.
- You must use this form to update regulated equipment and installation charges on an annual basis. You must file a Form 1205 with your local franchising authority (or the Commission where it is certified to regulate basic tier services) within 60 days after the end of your fiscal year. Moreover, you must file a Form 1205 at least 30 days before the effective date of any increase in regulated charges for equipment and installations for the basic service tier. If you have already unbundled equipment and installation charges at cost, however, you must wait one year from the date on which you unbundled equipment and installation charges before changing these charges.

Overview

This form comprises the following sections:

- Cover Sheet. This solicits information on who you are and the reason that you are submitting this Form 1205.

¹ Systems qualifying for small systems administrative relief do not have to unbundled equipment pending the development of average cost schedules, nor do such systems have to file this Form 1205.

² If you are submitting this Form 1205 to the Commission and it is not attached to any other form, send it to Federal Communications Commission, FCC Form 1205, 445 12th Street, S.W., Washington, D.C. 20554.

- *Schedule A: Capital Costs of Service Installation and Maintenance of Equipment and Plant.* This schedule is used to compute the annual costs of the equipment and plant necessary for the installation and maintenance of customer equipment used to receive basic tier services. It excludes the annual capital costs of customer equipment, however.
- In order to reduce the administrative burden on operators who face difficulties in identifying on their books the capital and other costs specifically to maintain and install customer equipment, Schedule A allows the operator to report on Schedule A annual costs for equipment and plant necessary for the installation and maintenance of cable facilities generally. These costs may include the investment in property, plant and equipment for a range of cable maintenance and construction activities in addition to customer equipment and installation activities. Then, in worksheets described below, this number is reduced by a percentage that estimates the amount of these costs that represents maintenance and installation of regulated customer premises equipment. Capital amounts are converted to annual expenses based on a prescribed rate of return and accounting depreciation.
- *Schedule B: Annual Operating Expenses for Service Installation and Maintenance of Equipment.* This schedule collects total annual operating expenses for installation and maintenance of cable facilities. The costs collected here include salaries, benefits, and supplies.
 - *Schedule C: Capital Costs of Leased Customer Equipment.* This schedule computes the annual capital costs for each model or category of customer premises equipment that you offer in connection with regulated service. The method of computing capital costs is the same as that used in Schedule A.
 - *Schedule D: Average Hours Per Installation.* This schedule is used only if you choose to charge average rates for different types of installation services, as opposed to an hourly service charge. This schedule collects the average hours required to complete various types of installations.
 - *Worksheet for Calculating Permitted Equipment and Installation Charges.* You must complete this worksheet only if you are calculating the costs of specific equipment and installations to derive the maximum rates you may charge for regulated equipment and installations.
 - *Worksheet for Calculating Total Equipment and Installation Costs.* Utilizing the data collected and computed in Schedules A through D, this worksheet calculates a monthly per subscriber cost of regulated equipment and installations that is used to separate these costs from cable services rates. You must complete this worksheet only if you are filing this form in conjunction with a FCC Form 1200, Form 1220, or Form 1225 to establish maximum permitted rates for regulated cable services.
 - *Summary Schedule: Current Equipment and Installation Rates.* This Schedule collects information determined on the Worksheet for Calculating Permitted Equipment and Installation Charges and presents it in summary form together with your actual equipment and installation charges.

General Instructions

You should complete this Form using financial data from the company's general ledger and subsidiary records maintained in accordance with generally accepted accounting principles. The Commission's cost accounting rules require that cable operators maintain their accounts in accordance with these requirements and in a manner that will enable identification of appropriate costs and application of the Commission's cost assignments and allocation procedures (see 47 C.F.R. § 76.924). The data submitted in this Form 1205 should be from the operator's fiscal year indicated on the cover sheet. However, when there has been an unusual change in operations, data from a representative month may be used for the calculation of rates, subject to acceptance by the franchising authority or, when applicable, by the FCC. You must attach justification for this approach.

To the extent you have not previously maintained accounts in a manner consistent with our rules, and do not have fully developed cost data, you must indicate on this Form that you are using estimates, where necessary, in calculating equipment and installation costs and rates, and provide justification that the estimates are reasonable.

The data for customer equipment and for the installation and repair of customer equipment and service (includable on Schedules A,B, and C) may be identified on a franchise, system, regional, or company level. For purposes of calculating cable service rates on an FCC Form 1200, 1220, or 1225, the cost data developed on this Form 1205 must be adjusted to the franchise area level (see Worksheet for Calculating Permitted Equipment and Installation Charges or Worksheet for Calculating Total Equipment and Installation Costs below for instructions).

Cable operators completing this Form in conjunction with FCC Form 1200 should be aware that the figure entered on line 14 of the Worksheet for Calculating Total Equipment and Installation Costs will be entered on either line D2 or line E2, and on line I2 of FCC Form 1200.

Precision of Calculation; Rounding

If you are performing the calculations required by this form by hand, you must display at least four decimal places. If you are using a calculator or computer, you must carry out the calculation to the full precision afforded by your calculator or computer and display at least four decimal places. If you are using the spreadsheet version of this form, the spreadsheet will round calculations for you; you do not need to display additional decimal places.

The only place you should round the figures is in the Summary Schedule. These figures should be rounded to the nearest cent.

About the Spreadsheet

The FCC has developed an electronic spreadsheet to assist you in making the necessary calculations on the Form 1205. We strongly recommend that you make use of this spreadsheet.

If you use the spreadsheet, the values for the shaded boxes on the Form 1205 will be calculated automatically and filled in for you. Instructions for the corresponding line numbers are italicized.

You may submit a completed version of an official Form 1205, an exact photocopy of that form, or a copy generated by Commission software, provided that it has the appearance of an actual Form 1205.

If You Need Help

If you have any questions while completing this Form, please call the FCC's Media Bureau between 9:30 a.m. and 5:30 p.m. Eastern Standard Time on Monday through Friday at (202) 418-7200.

FCC NOTICE TO INDIVIDUALS REQUIRED BY THE PAPERWORK REDUCTION ACT

We have estimated that each response to this collection of information will take 12 hours. Our estimate includes the time to read the instructions, look through existing records, gather and maintain the required data, and actually complete and review the form or response. If you have any comments on this burden estimate, or on how we can improve the collection and reduce the burden it causes you, e-mail them to pra@fcc.gov or send them to the Federal Communications Commission, AMD-PERF, Paperwork Reduction Project (3060-0703), Washington, DC 20554. Please **DO NOT SEND COMPLETED APPLICATIONS TO THIS ADDRESS**. Remember – you are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0703.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, P.L. 104-13, OCTOBER 1, 1995, 44 U.S.C. 3507.

LABOR COST AND POLICY CHANGES

Indicate your answer to the following three questions by placing an "x" in the appropriate box

1. Have you included the labor costs associated with subscriber cable drops in your charges for initial installation?

YES
 NO

2. Have you capitalized the labor costs associated with subscriber cable drops?

YES
 NO

3. If you have filed this form before, have you changed any policy, e.g., cost accounting or cost allocation that causes an increase in the costs included in the computation of equipment and installations charges?

YES (You must attach a full explanation)
 NO
