## Summary

**Meat Animals Production, Disposition, and Income:** Final Estimates by State, 2013-2017, U.S. Department of Agriculture, Agricultural Statistics Board, National Agricultural Statistics Service, Statistical Bulletin No. 1059.

**Introduction:** This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 2013 through 2017. The production, disposition, and income from meat animals for 2013-2017 were published during calendar years 2014-2018. Data included in this publication provide a historic record and a benchmark for current estimates.

**Procedures:** Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2017 Census of Agriculture. Other data series considered included slaughter data, shipment records, imports, exports, and any other available administrative information. The 2013-2017 estimates shown herein are considered final and will not be revised again.

At the National level, revisions to estimates of meat animals production and gross income were less than one percent for cattle and less than one percent for hogs.

**Agricultural Census Publications:** The U. S. Department of Agriculture's National Agricultural Statistics Service (NASS) will release several products from the 2017 Census of Agriculture on April 11, 2019. The Census is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, state, and national levels. The Census includes all places from which \$1,000 or more of agricultural products, including government payments, were produced and sold, or normally would have been sold, during the census year. Census publications also include demographic items such as sex of producer, residence on or off the farm, days worked off farm, years present on farm, age group categories, race, and number of persons living in each household.
