ATTACHMENT 6_E2a: ExPECTT ROUTING FOR CONSENT PROCESS

Parental permission is required for respondents who are NOT 18 years old or older.

1. Is [child's name] 18 or older?

    2. Yes
    3. No

PROGRAMMING NOTES:

CHECK #1: We will check response against respondent's age at last data collection. If response does not cohere with our expectations, there will be a prompt asking FI to check and reenter data.

CHECK #2: If a second entry also does not cohere with our expectations, FI will be asked to confirm age once more.

CHECK #3: ALL respondents who report being 18 or older will be routed to a screen that says:

2. You have indicated that you are at least 18 years of age. Is this correct?

    1. Yes
    2. No

IF YES, respondent is **age 18 or older**, bypass parental permission and proceed directly to **youth consent**.

IF NO, respondent is not **age 18 or older**, proceed with parental permission, followed by **youth assent**.
