Question

Answer

1 OPDIV:

2 PIA Unique Identifier:

2a Name:

3 The subject of this PIA is which of the following?

- General Support System (GSS)  
 Major Application  
 Minor Application (stand-alone)  
 Minor Application (child)  
 Electronic Information Collection  
 Unknown

3a Identify the Enterprise Performance Lifecycle Phase of the system.

3b Is this a FISMA-Reportable system?

- Yes  
 No

4 Does the system include a Website or online application available to and for the use of the general public?

- Yes  
 No

5 Identify the operator.

- Agency  
 Contractor

6 Point of Contact (POC):

POC Title

POC Name

POC Organization

POC Email

POC Phone

7 Is this a new or existing system?

- New  
 Existing

8 Does the system have Security Authorization (SA)?

- Yes  
 No

8a Date of Security Authorization

11 Describe the purpose of the system.	National Outbreak Reporting System Public (NORS Public) is a website (also known as the Foodborne Outbreaks Online Database) that posts certain surveillance data for public access. NORS Public enables the public to view a small subset of filtered enteric and foodborne outbreak data captured by the National Outbreak Reporting System (NORS) and select pathogens transmitted commonly through food captured by the Foodborne Diseases Active Surveillance Network (FoodNet). From this data, individuals can see how rates of illnesses have changed over the past 20 years for nine pathogens transmitted commonly through food.	
12 Describe the type of information the system will collect, maintain (store), or share. (Subsequent questions will identify if this information is PII and ask about the specific data elements.)	National Outbreak Reporting System Public (NORS Public) has no PII data entry capability. It is a searchable, subset of filtered food-borne outbreak data to include food-borne, waterborne, and enteric (intestinal) diseases spread by human contact, environmental contamination, animal contact, and other means, and select pathogens transmitted commonly through food. The searchable dataset contains non-sensitive publicly available data and does not contain PII.  This is an external, publicly facing website that does not require authentication.	
13 Provide an overview of the system and describe the information it will collect, maintain (store), or share, either permanently or temporarily.	NORS Public is a visual representation of the annually published, and publicly accessible, National Outbreak Reporting System report. It allows summarized views of Foodborne, Waterborne, and Person to person outbreaks. This summarized information includes the location of outbreaks (at a state level), number of outbreaks per year/month, the mode of transmission, and the etiology of an outbreak. There is no individual level data in the system. Additionally, no data is collected nor maintained in the system.  This system is a static analysis data set that is made available annually. The data contained in the system is presented to and can be used by the general public to communicate general information related to foodborne diseases via graphs and charts. The source data is from the Division of Foodborne, Waterborne, and Environmental Diseases. There is no PII data contained within the system. The application graphs and charts and the capability to filter the data. There is no data entry or other mechanism to save data to the system. This is an external, publicly facing website that does not require authentication.	
14 Does the system collect, maintain, use or share PII?	<input type="radio"/> Yes <input checked="" type="radio"/> No	
39 Identify the publicly-available URL:	<input type="text" value="https://wwwn.cdc.gov/foodnetfast"/>	
40 Does the website have a posted privacy notice?	<input checked="" type="radio"/> Yes <input type="radio"/> No	
40a Is the privacy policy available in a machine-readable format?	<input checked="" type="radio"/> Yes <input type="radio"/> No	

41 Does the website use web measurement and customization technology?  Yes  No

41a Select the type of website measurement and customization technologies is in use and if it is used to collect PII. (Select all that apply)

Technologies	Collects PII?
<input type="checkbox"/> Web beacons	<input type="radio"/> Yes <input type="radio"/> No
<input type="checkbox"/> Web bugs	<input type="radio"/> Yes <input type="radio"/> No
<input checked="" type="checkbox"/> Session Cookies	<input type="radio"/> Yes <input checked="" type="radio"/> No
<input type="checkbox"/> Persistent Cookies	<input type="radio"/> Yes <input type="radio"/> No
Other... <input type="text"/>	<input type="radio"/> Yes <input type="radio"/> No

42 Does the website have any information or pages directed at children under the age of thirteen?  Yes  No

43 Does the website contain links to non- federal government websites external to HHS?  Yes  No

General Comments
