Refresher Course Application**

NIOSH Spirometry Training Program Refresher Course Application

TRAINING REQUIREMENTS OF THE COTTON DUST STANDARD

Authority for approval of training courses in pulmonary function testing as required in the Cotton Dust Standard, 29 CFR 1910.1043, has been delegated to the National Institute for Occupational Safety and Health.

In order to expedite processing of applications for approval, it would be appreciated if you electronically submit your copy of all material requested. Materials may also be mailed.

The NIOSH Spirometry Training Program Initial Course Sponsorship Application, which provides guidelines for faculty, content, and equipment is attached along with model course objectives and Appendix D of the Cotton Dust Standard.

Public reporting burden of this collection of information is estimated to average 8 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0138).

NIOSH-Approved Spirometry Refresher Course Application

Please carefully complete all the questions below (print or type). You will be requested at the end of this form to certify that in your professional judgment, you meet these minimum requirements.

1. NIOSH Course Sponsor #, Name, Address, Telephone Number, and Email:

NIOSH-Approved Course Sponsor # _____

2. NIOSH-Approved Course Director(s) who will offer the Refresher Course for this sponsor:

Course Director's Name	E-mail address for correspondence
1.	
2.	
3.	
4.	
5.	
6.	

3. Course Faculty Qualifications:

The course director shall assure that the lecturers have adequate educational backgrounds and experience to cover the required material. Please list faculty members who plan to teach in your NIOSH-Approved Spirometry Refresher Course. Only faculty pre-approved by NIOSH may teach in any NIOSH-approved spirometry course. If you want someone to teach in the refresher course who has not already been approved by NIOSH, please forward a request to NIOSH for their approval and include a current CV from that individual.

NIOSH-Approved Spirometry Refresher Course Faculty
1.
2.
3.
4.
5.

4. Student Eligibility:

Only students who have successfully completed the initial NIOSH-Approved Spirometry Training Course are eligible to take the NIOSH-Approved Spirometry Refresher Course. Students must provide a copy of their certificate to the course sponsor for verification. Students with a course certificate that is more than 5 years old will need to complete the Initial Training Course again before taking the Refresher Course.

5. Course Design and Content:

Communication with course attendees prior to the course should include information on specific types of spirometers that the students currently use or intend to use. It is highly recommended that students submit examples of spirograms they have collected. The course director could then identify common areas that need to be reviewed and tailor each course according to the class needs.

a. Course Design:

The course should consist of approximately 7 hours of instruction. NIOSH does not deem it appropriate that the NIOSH-Approved Spirometry Refresher Course curriculum be a repeat of day 1 training of the NIOSH-Approved Spirometry Course, nor does NIOSH deem it appropriate that both the introductory and refresher training courses be conducted on the same day using the same faculty and practicum equipment. The objectives for the Spirometry Refresher Training are attached to this application.

- b. Minimum Course Content for the requirements in (4.a.) should include
1. Review of the most recent ATS/ERS testing standards and guidelines,
 2. Review of technical procedures and instrumentation requirements including calibration procedures, sources of error, and their correction for both volume displacement and flow measuring spirometers,
 3. Review of the effective use of volume-time and flow-volume displays,
 4. Differentiation of obstructive from restrictive disease patterns on the spirograms,
 5. Review of common spirometry testing errors and applicable corrective actions.

An agenda showing lecture topics, time allocations, and lecturers' names should be attached to this application.

6. Refresher Course Materials

Course materials should adequately cover the required course content (Item 4b above). NIOSH has developed a course outline and other materials that you may use to develop your own curriculum. Submit one copy of all instructional materials, including PowerPoint, internet links, and student handouts.

7. Certificate of Course Completion:

A certificate showing satisfactory completion of the course must be provided to each trainee. The certificate should contain the following information

1. A non-removable watermark
2. Course director's signature
3. Course dates
4. NIOSH-approved Sponsorship Course approval number
5. A statement that the certificate is valid for 5 years and 7 months from the date of the course
6. Any CEUs awarded

A sample of the NIOSH-approved Course Sponsor's certificate must be submitted.

NOTE: NIOSH's approval of the course means that the Course Sponsorship meets the minimum technical requirements for teaching spirometry testing as set forth in the Cotton Dust Standard (29 CFR 1910.1043 and 1910.1046). **It does not constitute NIOSH certification of individuals completing the course.**

8. Notification Procedures:

Any changes in course faculty or content must be reported to NIOSH for approval.

All dates of prospective Refresher Courses must be submitted to NIOSH at least 30 days

prior to such courses. (Telephone or electronic notification, as soon as course date is known, is required in cases when a course is scheduled without time for the 30 day notice).

The sponsor will provide NIOSH with course dates, location (city, state, country), and the number of students for each course completed on an annual basis. A reporting form is available on the password-secured site for course directors (SAMS) accessed via the NIOSH web page. **Please submit this form (or email with similar format) to STPReportsdc.gov**

Course Director Certification

I certify that course content, materials, and faculty are adequate and meet minimum requirements. I have completed this form as accurately and fully as possible. I understand that if during a NIOSH site visit the course does not comply with the application criteria and statement I have made, approval will be withdrawn.
