Criteria for continuing on to the In-Depth Interview (IDI):

- (1) Adult smokers of regular cigarettes between 18-54 years of age (criteria: persons who reported smoking \geq 100 regular cigarettes during their lifetime and who, at the time of the survey, reported smoking regular cigarettes ever day or some days)
- (2) Adult dual user between 18-54 years of age (criteria: current smokers who reported using e-cigarettes, even one time and who, at the time of the survey, reported using e-cigarettes every day or some days)

Approximately 100 participants will be offered the opportunity to participate in an IDI (see page 94) until we recruit the target number of participants (25 adult smokers of regular cigarettes and 25 adult dual users). Sampling 100 participants will allow us to reach our previously mentioned target quotas
