

Women's Health Needs Study Informed Consent to be a Research Participant

My name is _____ and I am working with NORC and the Centers for Disease Control and Prevention on this study.

Why we are doing this study? We are trying to find out about the health care needs of women age 18 to 49 years in your community. We plan on interviewing about 2,000 women for this study.

Who is funding this study? This study is funded by the Centers for Disease Control and Prevention.

What would I be asked to do if I am in this study? The interview will take you about 45 minutes. We will read you the questions in your preferred language. We will be asking you some questions to see if you are eligible to be in the study. These will be about things like where you and your family are from, what languages you speak, and if you have lived in certain countries. If you are eligible, give consent, and then choose to enroll in the study, then we will be asking you questions such as how long you have been in the US, if you have had a medical exam, your childbirth experiences, and what you and your family thinks about female circumcision and your experiences with female circumcision. Some of the study questions may make you feel uncomfortable. You can skip any question. Your answers are completely private and only results from the whole group of women will be included in any report.

How long will it take for me to participate in this study? For this study you will do one interview that will take about 45 minutes to complete. This will end your time in the study.

Are there any risks for me if I decide to participate? The risks to participating in this research are minimal. However, some of the questions are personal and might make you uncomfortable. You are free to skip or not answer any questions. You can stop at any time. I have community resources available for you if you need help finding support or services in your community.

If you choose to do the survey whether you complete the survey or not, you will not lose access to any services that you would otherwise be eligible for. Your answers will be kept private to the extent allowed by law and will be used only for research. The study has a Certificate of Confidentiality and a Privacy Certificate, so no one outside the study, even an official of the court, the government or law, can request your information. However, if interviewers and other study staff learn of immediate plans to have your minor daughter circumcised they may be legally obligated to report this as child abuse to state or local authorities. The study does not ask you about circumcision in your daughter.

Employees of CDC, or experts and contractors working for CDC, may review information sent through computer networks to assess security. We will not collect your name or other information that identifies you during this interview. When results from this research are presented, we will not include any information that might be used to figure out who you are.
