TITLE OF INFORMATION COLLECTION:

Information Gathering and Usability Testing to Harmonize AHRQ Data Tools

PURPOSE:

AHRQ has a number of data tools online that allow users with little to no programming experience to use data. These include MEPS tables and MEPSnet (Household and Insurance Component), the Healthcare Cost and Use Project (HCUPnet and FastStats), the Quality and Disparities Reports and tables from the CAHPS user database.

This project will interview users (up to 10 for each tool) in order to assess needed improvements and identify ways that the tools could be harmonized across data sources to improve the user experience and reduce AHRQ’s total cost of developing and maintaining these tools. This collection is one of several activities feeding into this assessment.

This collection is entirely for AHRQ’s review of the tools and improving our service to customers. It is in no way related to a scientific or policy decision

DESCRIPTION OF RESPONDENTS:

Targeted respondents are current or potential customers of AHRQ data tools. They are familiar with at least one AHRQ dataset or data tool and have previously engaged with AHRQ to learn more about AHRQ datasets or summary statistics. AHRQ employees will identify the respondents that they anticipate will be most enthusiastic to participate in an effort to improve AHRQ’s data tools.

CERTIFICATION:

I certify the following to be true:

1. The collection is voluntary.

2. The collection is low-burden for respondents and low-cost for the Federal Government.
3. The collection is non-controversial and does not raise issues of concern to other federal agencies.
4. The results are not intended to be disseminated to the public.
5. Information gathered will not be used for the purpose of substantially informing influential policy decisions.
6. The collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the future.
