

Program Director Survey

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Draft for OMB

September 2020

This collection of information will be used to describe the characteristics of infants and toddlers and families served by Early Head Start, and the characteristics and features of programs and staff that serve them. Your participation in the study is voluntary. Please be assured that all information you provide will be kept private to the extent permitted by law. The survey will take about 30 minutes to complete.

SECTION A: PROGRAM CHARACTERISTICS/INPUTS

To begin, we would like to ask some questions about the characteristics of your program. Throughout this survey, we want you to focus only on Early Head Start and the staff working with pregnant women or with infants and toddlers and their families. This includes both teachers working in classrooms in program centers and home visitors providing services to pregnant women and families.

SECTION X. COVID-19

The COVID-19 pandemic was a significant event that had an impact on the lives of many individuals and families. The next few questions are about how home-based services were affected by the pandemic and whether services were offered in person or virtually.

X1. Thinking first about in-person home visits in the home-based option last spring, that is, March to June 2020, which of the following best describes your program? Did your program....

Offer in-person home visits to all families.....0

Offer in-person home visits to some families or,.....1

Not offer any in-person home visits (for example, program closed or only virtual visits were offered).....2

If more than one of the above was true about in-person home visits between March and June 2020, please indicate which one was true for the majority of the time.

X2. Did your program offer virtual home visits to families in the home-based option during the spring 2020 pandemic, that is, between March and June 2020? Virtual home visits are regularly scheduled home visits conducted by video conference or phone.

X8. Many programs adopted innovative strategies to respond to challenges they faced as a result of the COVID-19 pandemic. Thinking about home visiting services for families in the home-based option, can you describe one such strategy that your program adopted that you consider innovative or view as a success?

X9. Unfortunately, COVID-19 is not the last crisis we will face. For this last question, we would like you to think about what was most helpful to your program during the COVID-19 pandemic, so that we can plan for future emergencies. Thinking about both center- and home-based options if applicable, what supports do you hope to have in place to prepare for future emergencies?
