

trades training would be a significant step forward. Such funding should be established not only at the federal level but also through state and local government action. The shape that such funding might take and the ways in which the federal government might support it merit further development and consideration. The ACHP should promote a dialogue on the issue with key partners, including DOI, the National Conference of State Historic Preservation Officers, the National Association of State Workforce Agencies, Certified Local Governments, the National Alliance of Preservation Commissions, and the National Trust for Historic Preservation.

Traditional trades are critically important to preserving the heritage of our historic built environment for future generations. They also can translate into secure, well-paying jobs that help revitalize communities both physically and economically. Expanding training opportunities and networks in the traditional trades is essential. It is critical to do what we can to enable this important field to expand into pathways that are available to the American worker.

Wide ranging in lines of expertise, it is the skilled craftworker who is making preservation happen through hands-on and on-site work. The connection to preservation is the central theme that brings many different skill sets together. It is the contract worker, the stone mason, the woodcrafter, the conservator, the trade union member, the craft guild member, maintenance crews, and building managers—all preserving on a daily basis.

Placing trust with the decision making on the qualified tradesperson or providing the opportunity to share the responsibility at the preservation job site with both the preservation professional and the skilled tradesperson empowers this field. By broadening this vision of the preservation expert—the skilled craftworker—the ACHP has adopted this policy statement to encourage and help guide efforts and partnerships to address this urgent need while offering rewarding careers and professional fulfillment.
