# Personal Computer Data Input for Nuclear Regulatory Commission Licensees

**Effective Date**  
**March 24, 2020**

A booklet of guidance for data submissions to  
NMMSS using electronic formats

## DISCLAIMER

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor any agency thereof, nor any of their employees, make any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

## PAPERWORK REDUCTION ACT STATEMENT

NMMSS Report D-24 provides guidance for submitting the mandatory information collections in NRC Forms 740M, 741, 742, and 742C that are subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et. seq.). These information collections were approved by the Office of Management and Budget (OMB), approval numbers 3150-0057, 3150-0003, 3150-0004, and 3150-0058. Send comments regarding this information collection to the Information Services Branch (T6-A10M), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by e-mail to Infocollects.Resource@nrc.gov, and to the OMB reviewer at: OMB Office of Information and Regulatory Affairs (3150-0057, 3150-0003, 3150-0004, and 3150-0058), Attn: Desk Officer for the Nuclear Regulatory Commission, 725 17th Street, NW Washington, DC 20503; e-mail: oira\_submission@omb.eop.gov.

## PUBLIC PROTECTION NOTIFICATION

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

## **1. INTRODUCTION**

---

### **1.1. Reporting Guidelines**

Refer to the current version of the **NRC Instructions for Completing Nuclear Materials Transaction Reports; NUREG/BR-0006** and **Instructions for Completing Material Balance Report and Physical Inventory Listing NUREG/BR-0007** for specific Nuclear Regulatory Commission (NRC) requirements in reporting data to the NMMSS. These documents specify that data submissions must be made in acceptable electronic forms to the Nuclear Materials Management Safeguards System (NMMSS) and provide the information necessary for completing the source documents (forms) referenced in this directory.

NRC licensees required to report government owned material to NMMSS should refer to the **D-23, Personal Computer Data Input for Department of Energy Contractors** for guidance in the electronic reporting of this material.

### **1.2. Purpose**

This directory provides formatting requirements for the reporting of nuclear material information in electronic file formats to the NMMSS in accordance with the NRC guidelines. A reporting licensee has the option to prepare reported data in an electronic file using the formats presented here using a variety of text editors, XML editors or programmatically in Material Control and Accountability Systems. This data is then saved as a text file and sent to NMMSS via diskette, CD, Zip disk, SIMEX, Direct Link, or electronic mail.

### **1.3. Acceptable Electronic Formats**

The preferred format accepted by NMMSS for electronic data transfer is eXtensible Markup Language (XML). New technologies are constantly being developed to improve data management. As these methods are tested and analyzed by NMMSS staff, revisions will be made to data input procedures and guidelines. Visit the NMMSS website, [www.hss.energy.gov/nmmss](http://www.hss.energy.gov/nmmss), for the latest information and guidelines.

Another alternative for submitting electronic data to NMMSS is the use of the Safeguards Management Software (SAMS) for transcribing reported data into a machine readable format. This software is currently available at no charge from NMMSS.

#### **1.3.1. Extensible Markup Language (XML) File Format**

The XML format may also be referred to as tagged data as it is based upon the use of tags (words bracketed by '<' and '>') and attributes (of the form name="value"). The NMMSS XML data submission format uses specific tags to establish the

limits of units of data. An advantage of using XML is that data is represented by tags which identify the values being reported; however, these tags must be entered exactly as specified or they will not be recognizable to the import programs.

**The rules for XML files are strict. The following conditions will cause a failure in an XML data import:**

- A tag entered incorrectly (For example; using the wrong tag name, inserting spaces, or using improper capitalization).
- A missing tag.
- A missing end tag indicator (designated by the /) for every opening tag.
- A data attribute without surrounding quotes.

Field sizes of reported data may be adjusted to fit the value, instead of requiring additional spaces to meet the allocated size as seen in the 80 Column file formats. The reported data is entered into double quotes to the right of the attribute tag. Then, the file is saved as a text file using a file extension of .xml and submitted to NMMSS.

The use of the following characters inside the double quotes surrounding the value may be forced to be accepted by substituting the following code shown in the table below in place of the character. For example; to report a text comment such as Insert batch id 'Batch6a' in block 24D, the tag value would need to be expressed as "Insert batch id &apos;Batch6a&apos; in block 24D."

Character	Code
'	&apos;
"	&quot;
&	&amp;
<	&lt;
>	&gt;

Each type of reported data; Inventory, Transaction, and Material Balance, has specific tags as shown in more detail under each section of this document. Data codes, which are necessary to identify the data in the 80 Column file format, are inferred by the XML tag structure and therefore are not required. Refer to the individual data sections for additional details. Additional resources are available about XML online from the following websites:

- [www.w3schools.com](http://www.w3schools.com)
- [www.ucc.ie/xml/](http://www.ucc.ie/xml/)

## **1.4. Understanding the Format Presentation**

Within each format table presented in this directory the form identifier is listed along with the block identification number or number character combination found on the

form. XML tables will display the tag identifier (XML attribute) to be used for this block.

The **Type** column defines the form and length of the accepted data. For example, ‘Char(1)’ indicates that the data will consist of a single character (letter or number) and ‘Char(20)’ indicates that the data will consist of a combination of 20 characters, letters, and numbers. ‘Date’ indicates that the data is a calendar date and will be accepted in a specified format. ‘Num(11,2)’ indicates the data is restricted to numbers and has an overall length of 11 numbers of which two are to the right of the decimal. In the XML format, a numeric value must contain a decimal. For example, if the type is specified as Num(12,3) and the number value to be submitted is the whole number 15; enter 15 as 15.00 (translates to 15.000).

The **Essential** column indicates the minimum data submission requirements for successful file import when a ‘✓’ is present in the column. This column does not indicate the necessity of data required by the NRC to be reported; only the requirement for a successful file import into NMMSS.

The **Note** column lists any remarks that will indicate special instructions, such as the format to be used or a value that remains constant. Note that all dates are to be entered in the format MM/DD/YYYY in XML formatted file. This means that dates will be reported with their two-digit month indication followed by the two digit day indication and then the four digit year. Note that negative numbers are generally permitted and indicated by the placement of a minus sign (-) to the left of the number.

## 1.5. File Creation

A file extension should be assigned which indicates the type of file format used. For example, **an XML file should always end in .xml**.

## 1.6. Data Submission Methods

Contact the NMMSS staff, (301)-903-6251, for additional directions regarding the use of SIMEX, Direct Link, or electronic mail. Electronic data may be mailed through the U.S. Postal Service on electronic media to the following address.

**Peter Dessaules  
Program Manager  
Office of Nuclear Materials Integration  
NMMSS Program, NA-532,  
Germantown Building, Room A-378  
U.S. Department of Energy  
1000 Independence Avenue, SW  
Washington, DC 20585-1290**

(For classified documents)

Refer to SIMS for a Classified Address or contact NMMSS at 301-903-6251 or email “NMMSS@nnsa.doe.gov”.

When mailing electronic media to NMMSS label the media with the following information:

- Licensee's RIS (Reporting Identification Symbol of the data source)
- Name and telephone number of the person to contact if there are problems or questions
- Name of the data file
- Any special instructions, comments or explanations

Note: A printed listing of the electronic data may be included with the electronic media and may expedite data processing in the event a damaged disk is received. It is not necessary to include the DOE/NRC forms when submitting data electronically to the NMMSS.

## 2. TRANSACTION DATA

### 2.1. Requirements for DOE/NRC Form 741 and Concise Notes

#### 2.1.1. XML File Formatting

An example of transaction submission in XML format is shown below. Additional examples are shown in Appendix B along with the corresponding DOE/NRC forms. This is an example of raw XML produced by SAMS.

```
<TRANSACTIONS VERSION="2">

```

An important part of the XML format is the nesting of the records that make up a 741. In XML there are identifiers called Nodes which correspond to rows in the XML data. The Nodes have identifiers called Attributes which correspond to the data fields. For example, the SHIPMENT Node corresponds to the 741 Header record and the SHIPPERRIS Attribute is the Shipper RIS field of the Header record. Another important element of XML Nodes is that they can contain other nodes as known as nested nodes. The

Shipment Node(parent) can have MATERIAL, CONCISENOTE and OBLIGATION nodes (children). The following shows the nesting of the nodes for a 741.

```
SHIPMENT (header information, Shipper RIS, Receiver RIS etc..)
  CONCISENOTE
    • lines that make up the concise note
  OBLIGATION
    • lines required to report the obligations
  ELEMENT
    Contains element information for OBLIGATION
  ISOTOPE
    Contains isotope information for ELEMENT
MATERIAL
  • lines required to report the detail lines
ELEMENT
  Contains element information for MATERIAL
ISOTOPE
  Contains isotope information for ELEMENT
```

The next sample is the same XML file as above, but has been indented using tabs to make it for readable to the human eye. It will process the same as the raw data. It also emphasizes the nesting of the data rows in the XML.

This last listing shows the nodes and attributes in their properly nested configuration with information detailing the data requirements.

<**TRANSACTIONS** Is the main node for 741 transactions  
    **VERSION="2"** This indicates the current version of XML format.  
        >  
    <**SHIPMENT** Is a node and a child of TRANSACTIONS

It contains the information from the Header record, data code type 1

**SHIPPERRIS="ABC"**

Attribute in Shipment node

4 Alphanumeric Characters

Validated by RIS Authority Reference Table

**RECEIVERRIS="ABC"**

Attribute in Shipment node

4 Alphanumeric Characters

Validated by RIS Authority Reference Table

**TRANSFERNUMBER="00000001"**

Attribute in Shipment node

8 Alphanumeric Characters

If the datatype is integer then the number will be left padded with zeros during the import process

**CORRECTION="1"**

Attribute in Shipment node

1 Alphanumeric Character

**PROCESSCODE="C"**

Attribute in Shipment node

1 Alpha Character

Accepted values A,C or D

**ACTIONCODE="M"**

Attribute in Shipment node

1 Alpha Character

Validated by ActionCode section of StaticData Authority Reference Table

**NUMBEROFLINES="1"**

Attribute in Shipment node

Integer, non-negative

**NATUREOFTTRANSACTION=""**

Attribute in Shipment node

1 Alpha Character

Validated by TICode section of StaticData Authority Reference Table

if required

Also called TI Code

**SHIPPEDFORRIS=""**

Attribute in Shipment node

4 Alphanumeric Characters

Validated by RIS Authority Reference Table if required

Also called ForAccount

**SHIPPEDTORIS="ABC"**

Attribute in Shipment node

4 Alphanumeric Characters

Validated by RIS Authority Reference Table if required

Also called ToAccount

**TRANSFERAUTHORITY=""**

Attribute in Shipment node

17 Alphanumeric Characters  
No validation performed.

**UKFLAG=""**

Attribute in Shipment node  
1 Alpha Character  
Validated by SpecialIAEACode section of StaticData Authority  
Reference Table, acceptable values are blank, N or R  
Also called SpecialIAEACode  
The IAEA UK reportable indication is only required for transactions involving United Kingdom facilities. Reporting 'R' indicates that the UK data is reportable to the IAEA. Reporting 'N' indicates that the UK data is not reportable to the IAEA. Leave this field blank for data that does not involve the United Kingdom facilities.

**ACTIONDATE="4/25/2011"**

Attribute in Shipment node  
Date in mm/dd/yyyy format  
Also called Activity Date

**LICENSENUMBER=""**

Attribute in Shipment node  
10 Alphanumeric Characters  
Validated by INMTS Authority Reference Table if required

**PORTOFENTRY=""**

Attribute in Shipment node  
4 Alphanumeric Characters  
Discontinued 10/2003

**TOTALGROSSWEIGHT="0"**

Attribute in Shipment node  
Integer, non-negative  
Also known as GrossWeight

**TOTALVOLUME="0"**

Attribute in Shipment node  
Integer, non-negative

**SEALED SOURCE=""**

Attribute in Shipment node  
10 Alphanumeric Characters  
No validation occurs at this time.

**TOTRANSFERAUTHORITY=""**

Attribute in Shipment node  
17 Alphanumeric Characters  
No longer validated, was used for Contract Transfers.

>

**<CONCISENOTE** a node and a child of Shipment

There may be as many lines as required to send the concise note information

**LINENUMBER="1"**  
Attribute in ConciseNote node  
Integer, non-negative

**ENTRYREFERENCE="ENTRY"**  
Attribute in ConciseNote node  
20 Alphanumeric Characters

**TEXTOFCONCISENOTE="MESSAGE OF CONCISE NOTE"**  
Attribute in ConciseNote node  
60 Alphanumeric Characters

/>

<**OBLIGATION** a node and a child of Shipment  
>

<**MATERIAL** a node and a child of Obligation  
There may by as many lines as required to report the obligation information

**LINENUMBER="1"**  
Attribute in Material node  
Integer, non-negative

**COUNTRYCODE="CA"**  
Attribute in Material node  
2 Alpha Character  
Validated by CountryCode section of StaticData Authority Reference Table

>

<**ELEMENT** a node and a child of Material  
**ELEMENTWEIGHT="99.0000000"**  
Attribute in Element node  
Numeric (19,7)  
19 digits of precision and up to 7 decimal places  
decimal point is not implied

>

<**ISOTOPE** a node and a child of Element  
**MATERIALTYPE="20"**  
Attribute in Isotope node  
2 Alphanumeric Characters  
Validated by MaterialType Authority Reference Table

**ISOTOPeweIGHT="9.0000000"**  
Attribute in Isotope node  
Numeric (19,7)  
19 digits of precision and up to 7 decimal places  
Decimal point is not implied

```
    />
  </ELEMENT>
</MATERIAL>
</OBLIGATION>
```

**<MATERIAL**

is a node and a child of Shipment  
It contains the information from the Detail records, data code types 2 and 5

**LINENUMBER="1"**

Attribute in Material node  
Integer, non-negative

**TYPEINVENTORYCHANGE="34"**

Attribute in Material node  
2 Alphanumeric Characters  
Validated by list of Codes when required

**BATCH="BATCH"**

Attribute in Material node  
16 Alphanumeric Characters

**NUMBEROFITEMS="2"**

Attribute in Material node  
Integer

**OWNER="G"**

Attribute in Material node  
1 Alpha Character  
Validated by OwnerCode section of StaticData Authority Reference Table  
Also called Owner Code

**PROJECT="ABCDE03709"**

Attribute in Material node  
10 Alphanumeric Characters  
Validated by ProjectNumber Authority Reference Table if required  
Also called Project Number

**COEILINENUMBER="309"**

Attribute in Material node  
4 Alphanumeric Characters  
Validated by CompCode Authority Reference Table  
Also called Comp Code

*IAEA reporting facilities should put their IAEA Comp Code or IAEA Facility code in this field, NMMSS will translate during the import process*

**GROSSWEIGHT="100.0000000"**

Attribute in Material node

Numeric (19,7)

19 digits of precision and up to 7 decimal places

Decimal point is not implied

**NETWEIGHT="10.0000000"**

Attribute in Material node

Numeric (19,7)

19 digits of precision and up to 7 decimal places

Decimal point is not implied

**KEYMEASUREPOINT=""**

Attribute in Material node

2 Alphanumeric Characters

Validated by IAEA Facility Attachment Authority Reference Table

**MEASUREBASIS=""**

Attribute in Material node

1 Alphanumeric Characters

Validated by IAEA Facility Attachment Authority Reference Table

**OTHERMEASUREPOINT=""**

Attribute in Material node

2 Alphanumeric Characters

Validated by IAEA Facility Attachment Authority Reference Table

**MEASUREMETHOD=""**

Attribute in Material node

1 Alphanumeric Characters

Validated by IAEA Facility Attachment Authority Reference Table

**TOPPROJECT="ABCDEF1000"**

Attribute in Material node

10 Alphanumeric Characters

Validated by ProjectNumber Authority Reference Table if required

Only reportable with P ActionCode Project Transfer

Also called ToProject Number

**TOCOEILINENUMBER=""**

Attribute in Material node

4 Alphanumeric Characters

Validated by CompCode Authority Reference Table

Only reportable with P ActionCode Project Transfer

Also called To Comp Code

**BACKREFLINENUMBER="112"**

Attribute in Material node

3 Alphanumeric Characters

1<sup>st</sup> Character is the BackReferenceChangeDigit

2<sup>nd</sup> and 3<sup>rd</sup> Characters are BackReferenceLinenumber

>

---

<sup>10</sup> Weight Percent Isotope/Parts Per Million is reported as a percentage except when the material type is 70 (total uranium enriched in U-233), which is reported using 6 numeric digits and converted to decimal form by NMMSS.

<sup>11</sup> The RIS must attain authorization from NRC to report to the 3<sup>rd</sup> decimal. Three decimal reporting is only allowed when reporting Source Material.

<sup>12</sup> Element or Isotope weight may be essential to successful file import depending on the specified material type.

## 3. INVENTORY DATA

### 3.1. Requirements for DOE/NRC Form 742C

#### 3.1.1. XML File Formatting

An example of an inventory submission in XML format is shown below. Additional examples are shown in Appendix B along with the corresponding DOE/NRC form. This is an example of raw XML produced by SAMS.

```
<PHYSICALINVENTORY VERSION="2">
  <INVENTORY RIS="ABC" DATE="1/1/2011">
    <MATERIAL PROCESSCODE="" SEQUENCENUMBER="1" PROJECT="" COEILINENUMBER=""
      OWNER="" KEYMEASUREPOINT="" MEASUREBASIS="" OTHERMEASUREPOINT=""
      MEASUREMETHOD="" SCRAPPROGRAM="" ENTRYSTATUS="" NUMBEROFITEMS="0" BATCH=""
      LOCATION="" SITEMBA="">
      <CONCISENOTE PROCESSCODE="" LINENUMBER="1" ENTRYREFERENCE="ENTRY REF"
        TEXTOFCONSENTE="TEXT" />
      <ELEMENT ELEMENTWEIGHT="0.0000000" UNIT="">
        <ISOTOPE MATERIALTYPE="R" WEIGHTPERCENT="0.000000" ISOTOPEWEIGHT="0.0000000"
          UNIT="" />
      </ELEMENT>
    </MATERIAL>
  </INVENTORY>
</PHYSICALINVENTORY>
```

An important part of the XML format is the nesting of the records that make up a 742C. In XML there are identifiers called Nodes which correspond to rows in the XML data. The Nodes have identifiers called Attributes which correspond to the data fields. For example, the Inventory Node corresponds to the 742C Header record and the RIS Attribute is the RIS field of the Header record. Another important element of XML Nodes is that they can contain other nodes as known as nested nodes. The Inventory Node (parent) can have MATERIAL and CONCISENOTE nodes (children). The following shows the nesting of the nodes for a 742C.

INVENTORY (RIS and date.)	
MATERIAL	
0 to many lines required to report the inventory data	
ELEMENT	Contains element information for MATERIAL
ISOTOPE	Contains isotope information for ELEMENT
CONCISENOTE	0 to many lines that make up the concise note

The next sample is the same XML file as above, but has been indented using tabs to make it for readable to the human eye. It will process the same as the raw data. It also emphasizes the nesting of the data rows in the XML.

```
<PHYSICALINVENTORY VERSION="2">
  <INVENTORY
    RIS="ABC" DATE="1/1/2011">
      <MATERIAL

## 4. MATERIAL BALANCE DATA

<sup>15</sup> For total lines, this field will always contain "899".

<sup>16</sup> The RIS must attain authorization from NRC to report to the 3<sup>rd</sup> decimal. Three decimal reporting is only allowed when reporting Source Material.

<sup>17</sup> Element or Isotope weight may be essential to successful file import depending on the specified material type.

<sup>18</sup> Weight Percent Isotope/Parts Per Million is reported as a percentage except when the material type is 70 (total uranium enriched in U-233), which is reported using 6 numeric digits and converted to decimal form by NMMSS.

## 4.1. Requirements for DOE/NRC Form 742

### 4.1.1. XML File Formatting

An example of material balance submission in XML format is shown below. Additional examples are shown in Appendix B along with the corresponding DOE/NRC form. This is an example of raw XML produced by SAMS.

```
<MATERIALBALANCEREPORT VERSION="2">
  <MATERIALBALANCE RIS="YLM" STARTDATE="4/27/2010" ENDDATE="4/26/2011">
    <MATERIAL PROCESSCODE="" SEQUENCENUMBER="2" DATACODE=""
      MATERIALBALANCECATEGORY="80">
      <CONCISENOTE PROCESSCODE="" LINENUMBER="1" ENTRYREFERENCE="ENTRY"
        TEXTOFCONCISENOTE="TEXT" />
      <ELEMENT ELEMENTWEIGHT="0.0000000" TYPEINVENTORYCHANGE="MF" OTHERRIS="ACD"
        ENTRYSTATUS="" UNIT="">
        <ISOTOPE MATERIALTYPE="" ISOTOPeweIGHT="0.0000000" UNIT="" />
      </ELEMENT>
    </MATERIAL>
  </MATERIALBALANCE>
</MATERIALBALANCEREPORT>
```

An important part of the XML format is the nesting of the records that make up a 742. In XML there are identifiers called Nodes which correspond to rows in the XML data. The Nodes have identifiers called Attributes which correspond to the data fields. For example, the Material Balance Node corresponds to the 742 Header record and the RIS Attribute is the RIS field of the Header record. Another important element of XML Nodes is that they can contain other nodes as known as nested nodes. The Material Balance Node (parent) can have MATERIAL nodes (children). The following shows the nesting of the nodes for a 742.

MATERIALBALANCE (RIS and dates.)
MATERIAL
0 to many lines required to report the Material Balance data
ELEMENT
Contains element information for MATERIAL
ISOTOPE
Contains isotope information for ELEMENT
CONCISENOTE
0 to many lines that make up the concise note

The next sample is the same XML file as above, but has been indented using tabs to make it for readable to the human eye. It will process the same as the raw data. It also emphasizes the nesting of the data rows in the XML.

```
<MATERIALBALANCEREPORT VERSION="2">
  <MATERIALBALANCE

<sup>22</sup> Element or Isotope weight may be essential to successful file import depending on the specified material type.

---

## **APPENDIX A**

## **PROCESS CODE**

---

### **PROCESS CODE**

**DEFINITION:** The process code identifies the type of system action to be taken for the data being reported as follows:

1. Process code A is used to signify the initial submittal of data. Use process code C to replacement a data set already submitted to the NMMSS;
2. Process code C is used to signify the replacement of previously reported data. Its use is restricted to the replacement of data in the same reporting month;
3. Process code D applies when the facility intends the deletion of previously reported data. Its use is also restricted to applying only to data in the same reporting month; and
4. Process code Z is used in conjunction with action code D by the receiver to accept a shipper's change without the receiver having to retype the detailed lines.

**SPECIAL NOTE:** If replacement or deletion of data is desired, it is suggested that the reporting facility ensures that the accounting month to be affected is still "open" (being processed by the NMMSS) by calling the appropriate NMMSS contact since these actions are restricted and based on specified accounting periods.

## 80 Column File Formatting - Inventory

An example of an inventory submission in an 80 column file format document is shown below. Additional examples are shown in Appendix B along with the corresponding DOE/NRC form. Note that gridlines and the numbering structure at the top are not a part of the data submission. They are provided for demonstration purposes only.

## **Visual representation of field placement in 80 Column file formatting of inventory detail information.**

## **80 Column File Formatting – Material Balance**

Examples of material balance submissions in an 80 column file format document are shown below. For corresponding 742 forms showing these examples refer to Appendix B. Note that gridlines and the numbering structure at the top are not a part of the data submission.

	1	2	3	4	5	6	7	8	
1	2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	
3 ABC	2 0 0 1 0 1 2 0 0	0 2 1 2 3 1 2 0 0	2	1 1 2 0 7 0 0		1 1 1 2 0 0 1 1	DEF	N	A 0 0 0 0 0 1

## Material Balance Report Detail Information (Data Code 3 & 4)

<u>Field Description</u>	<u>742</u>	<u>80 Column File Format Position</u>			<u>Essential</u>	<u>Note</u>
		<u>Begin</u>	<u>End</u>	<u>Type</u>		
Data Code	-	1	1	Num(1)	✓	Value is 3 (Receipts) or 4 (Removals)
RIS	3	2	5	Char(4)	✓	Left justified
Material Type	5	6	7	Char(2)	✓	Left justified
Report Period From	4	8	15	Date	✓	MMDDYYYY
Report Period To	4	16	23	Date	✓	MMDDYYYY

<sup>38</sup> For total lines, this field will always contain “899”

Element Weight	Sec A column A Sec B Column 2	24	36	Num(13,2)	✓ <sup>39</sup> Right justified
<i>The value can contain a decimal point. Only XML format accepts 3 decimal place values.</i>					
Isotope Weight	Sec A column B Sec B Column 3	37	49	Num(13,2)	✓ <sup>39</sup> Right justified
<i>The value can contain a decimal point. Only XML format accepts 3 decimal place values.</i>					
Material Balance Category <sup>40</sup>	Sec A Row # Sec B column 1	50	51	Char(2)	Right justified Zero fill blanks
Other RIS	line 11,30, 42,43, & 51	52	55	Char(4)	Left justified
Inventory Change Type (ICT)	line 22 & 71	56	57	Char(2)	Left justified
Entry Status	-	58	58	Char(1)	
Process Code	Sec A & B PC	74	74	Char(1)	✓ See Appendix A.
Sequence Number <sup>41</sup>	Sec A & B SEQ	75	80	Num(6)	✓ Right justified

Note: If both the element weight and isotope weight are zero, there is no need to submit a data line for data code 1.
