II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC is requesting public comment on its intention to request the OMB’s approval for the information collection summarized below.

1. *The title of the information collection:* Appendix H to part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production And Utilization Facilities.”

2. *OMB approval number:* 3150–0011.

3. *Type of submission:* Revision.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion.

6. *Who will be required or asked to respond:* Holders of an operating license for commercial light-water power reactors.

7. *The estimated number of annual responses:* A reduction of 1 response. The total number of responses for the part 50 information collection will be reduced from 43,678 to 43,677.

8. *The estimated number of annual respondents:* There will be a reduction of 1 respondent submitting an extension request; however, the total number of respondents to the 10 CFR part 50

information collection remains unchanged.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* A reduction of 78 hours of reporting burden. The total burden for the part 50 information collection will be reduced from 3,731,355 to 3,731,277 hours.

10. *Abstract:* The NRC intends to publish a Direct Final Rule amending the information collection requirements in appendix H to 10 CFR part 50 related to the reactor vessel material surveillance program reporting requirements. The requirements for a reactor vessel material surveillance program are specified in appendix H to 10 CFR part 50. Appendix H to 10 CFR part 50 requires light-water nuclear power reactor licensees to implement a reactor vessel material surveillance program when it cannot be shown that the end of design life neutron fluence for the reactor vessel is below certain criteria. This program monitors changes in the fracture toughness properties of the reactor vessel materials adjacent to the reactor core. This is done by testing of irradiated material specimens that are in surveillance capsules in the reactor vessel for changes in material fracture toughness. The test results are used to assesses the integrity of the reactor vessel.

Licensees are required to submit a summary technical report to the NRC within one year of the date of the surveillance capsule was withdrawn from the reactor vessel unless an extension is granted by the Director, Office of Nuclear Reactor Regulation. The report will contain the data required by ASTM E 185, and the results of all fracture toughness tests conducted on the beltline materials in the irradiated and unirradiated conditions. At that time this requirement was adopted (48 FR 24008; July 26, 1983), there was still a limited amount of data from irradiated materials from which to estimate embrittlement trends of reactor vessels at nuclear power plants; thus, making it crucial for timely reporting of test results.

Some licensees have found it challenging to meet this one-year requirement due to the time needed for coordination among the multiple licensees participating in the program. Because a significant number of test specimens have been analyzed since 1983, resulting in an extensive understanding of embrittlement mechanisms, there is no longer a need for submitting a report within one year. As a result, the NRC determined that the

reporting requirement in appendix H to 10 CFR part 50 could be revised.

This Direct Final Rule will extend the reporting period from 1 year to 18 months and reduce the need for licensees to prepare and submit extension requests and the NRC resources to review the requests.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the estimate of the burden of the information collection accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 8th day of January 2020.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

Docket No. 50-293

Holtec Pilgrim, LLC

Holtec Decommissioning International, LLC

Pilgrim Nuclear Power Station

Exemption

I. Background

By letter dated November 10, 2015 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15328A053), Entergy Nuclear Operations, Inc. (ENOI) certified to the U.S. Nuclear Regulatory

Commission (NRC) that it planned to permanently cease power operations at Pilgrim Nuclear Power Station (Pilgrim) no later than June 1, 2019. On May 31, 2019, ENOI permanently ceased power operations at Pilgrim. By letter dated June 10, 2019 (ADAMS Accession No. ML19161A033), ENOI certified to the NRC that the fuel was permanently removed from the Pilgrim reactor vessel and placed in the spent fuel pool (SFP) on June 9, 2019. Accordingly, pursuant to Title 10 of the Code of Federal Regulations (10 CFR) Section 50.82(a)(2), the Pilgrim renewed facility operating license no longer authorizes operation of the reactor or emplacement or retention of fuel in the reactor vessel. The facility is still authorized to possess and store irradiated (*i.e.*, spent) nuclear fuel. Spent fuel is currently stored onsite at the Pilgrim facility in the SFP and in a dry cask independent spent fuel storage installation (ISFSI).

II. Request/Action

By letter dated March 25, 2019 (ADAMS Accession No. ML19088A127), as supplemented by letter dated July 30, 2019 (ADAMS Accession No. ML19211B509), ENOI requested an exemption from 10 CFR 140.11(a)(4) concerning offsite primary and secondary liability insurance. The exemption from 10 CFR 140.11(a)(4) would permit the licensee to reduce the required level of primary offsite liability insurance from \$450 million to \$100 million and to eliminate the requirement to carry secondary financial protection for Pilgrim.

By letter dated November 16, 2018 (ADAMS Accession No. ML18320A031), ENOI, on behalf of itself and Entergy Nuclear Generation Company (ENGCO) (to be known as Holtec Pilgrim, LLC), Holtec International (Holtec), and Holtec Decommissioning International, LLC (HDI, the licensee) (together, Applicants), requested that the NRC consent to: (1) The indirect transfer of control of Renewed Facility Operating License No. DPR-35 for Pilgrim, as well as the general license for the Pilgrim ISFSI (together, the Licenses), to Holtec; and (2) the direct transfer of ENOI's operating authority (*i.e.*, its authority to conduct licensed activities at Pilgrim) to HDI. In addition, the Applicants requested that the NRC approve a conforming administrative amendment to the Licenses to reflect the proposed direct transfer of the Licenses from ENOI to HDI; a planned name change for ENGCO from ENGCO to Holtec Pilgrim, LLC; and deletion of certain license conditions to reflect satisfaction and termination of all ENGCO obligations after the license transfer and equity sale.
