

Appendix C2a. Local Agency Director Survey Screenshots

WIC NUTRITION ASSESSMENT AND TAILORING STUDY Local Agency Survey

OMB Control No: 0584-xxxx
Expiration Date: XXXX/XXXX

INTRODUCTION

Thank you for taking the time to complete this survey. United States Department of Agriculture (USDA), Food and Nutrition Service (FNS) is sponsoring a national study to examine WIC's nutrition risk assessment process. FNS has contracted with Westat and Insight Policy Research to conduct this study.

As part of the study, FNS would like the input of WIC Local Agency Directors about the policies and guidance that their WIC clinics follow when conducting nutrition risk assessments and using assessment results to tailor benefits and services provided.

You may share the link and PIN for this survey with other staff at your agency so that they may assist in responding to questions about the nutrition risk assessment process. However, we would like the Local Agency Director to approve and submit the completed survey.

You and your staff may log in to the survey as many times as you wish before submitting. The website will automatically save your work as you go.

Please complete this survey by [date].

This information is being collected to assist the Food and Nutrition Service in obtaining a comprehensive and detailed description of the WIC nutrition risk assessment process and the ways in which participant benefits are tailored to address the assessment results. This is a voluntary collection and FNS will use the information to improve the delivery and tailoring of WIC services and increase satisfaction of both staff and participants. This collection does request personally identifiable information under the Privacy Act of 1974. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0584-[xxxx]. The time required to complete this information collection is estimated to average 33 minutes (0.55 hours) per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Agriculture, Food and Nutrition Service, Office of Policy Support, 1320 Braddock Place, 5th Floor, Alexandria, VA 22314 ATTN: PRA (0584-xxxx). Do not return the completed form to this address.
