## Description & Funding

### Description

**Priority:** Standard

**Date Needed:** 06/05/2020

**Determination Start Date:** 05/28/20

**Description:**

This is a revision request of a currently approved OMB protocol #0920-1215 (Expiration Date 02/28/2021). The Awardee Lead Profile Assessment (ALPA) data collection instrument will be used to: 1) identify common characteristics of funded childhood lead poisoning prevention programs and 2) inform guidance, resource development, and technical assistance activities conducted by the CDC Childhood Lead Poisoning Prevention Program (CLPPP) in support of the ultimate goal, which is blood lead elimination in children. Assessment findings will be shared on the CDC CLPPP website and in response to inquiries by the public, press, and Congress. The dissemination of results will support the ability for both funded and non-funded jurisdictions to: 1) identify policies and other factors that support or hinder childhood lead poisoning prevention efforts, 2) understand what strategies are being used by funded state and local governments (or their bona fide fiscal agents) to implement childhood lead poisoning prevention activities, and 3) use this knowledge to develop and apply similar strategies to support the national agenda to eliminate childhood lead poisoning. Changes included modifying survey questions with text box answers to gateway questions with multiple choice answer options. Additionally, specific terms and phrases were revised for conciseness and clarification and questions about primary prevention and lead elimination were added to the survey.

**IMS/CIO/Epi-Aid/Chemical Exposure Submission:** No

**IMS Activation Name:** Not selected

**CIO Emergency Response Name:** Not selected

**Epi-Aid Name:** Not selected

**Assessment of Chemical Exposure Name:** Not selected

**Goals/Purpose**

The purpose of this annual assessment under the cooperative agreement is to identify: 1) jurisdictional legal frameworks governing CDC-funded childhood lead poisoning prevention programs in the United States and 2) strategies for implementing childhood lead poisoning prevention activities in the United States.

**Objective:**

The ALPA information collection will serve to 1) identify common characteristics of awarded childhood lead poisoning prevention programs and 2) inform guidance and resource development in support of the ultimate elimination goal. The dissemination of results obtained from this information collection will enable jurisdictions to 1) identify policies and other factors that support or hinder childhood lead poisoning prevention efforts; 2) understand what strategies are being used by funded state and local governments (or their bona fide fiscal agents) to implement childhood lead poisoning prevention activities; and 3) use this knowledge to develop and apply similar strategies to support the national agenda to eliminate childhood lead poisoning. Both funded and non-funded jurisdictions will be able to apply these principles to their childhood lead poisoning prevention programs. Findings will be shared on CDC's CLPPP website and in response to inquiries by the public, press, and Congress.

**Activities or Tasks:** New Collection of Information, Data, or Biospecimens

**Target Populations to be Included/Represented:** Other

**Tags/Keywords:** Lead Poisoning

**CDC's Role:** Activity originated and designed by CDC staff, or conducted at the specific request of CDC, or CDC staff will approve study design and data collection as a condition of any funding provided

**Method Categories:** Survey

**Methods:** Each recipient has one project manager for lead poisoning prevention activities. Each project manager will complete the questionnaire in his or her official capacity. The ALPA questionnaire will use the EpiInfo functionality as the primary method for respondents to complete the information. The link will be sent via an invitation email by a CDC staff member to the attention of all project managers of the funded programs approximately 150 days before the end of the annual budget period. A follow-up email will be sent to the attention of all project managers approximately 130 days before the end of the annual budget period. Respondents who do not want to complete the online web questionnaire will be able to complete the Word questionnaire that will be emailed to them by a CDC staff member.

**Collection of Info, Data or Biospecimen:** Via survey that will have a web-based on paper-based option

**Expected Use of Findings/Results:** Assessment findings will be shared on the HHLPPP CDC CLPPP website and in response to inquiries by the public, press, and Congress. The dissemination of results will support the ability for both funded and non-funded jurisdictions to: 1) identify policies and other factors that support or hinder childhood lead poisoning prevention efforts, 2) understand what strategies are being used by funded state and local governments (or their bona fide fiscal agents) to implement childhood lead poisoning prevention activities, and 3) use this knowledge to develop and apply similar strategies to support the national agenda to eliminate childhood lead poisoning.

**Could Individuals potentially be identified based on Information Collected?** No

## Funding

Funding Type	Funding Title	Funding #	Original Budget Yr	# Years Award
CDC Cooperative Agreement	Childhood Lead Poisoning Prevention Projects, State and Local Childhood Lead Poisoning Prevention and Surveillance of Blood Lead Levels in Children	CDC-RFA-EH18-1806	2018	3
CDC Cooperative Agreement	Lead Poisoning Prevention- Childhood Lead Poisoning Prevention	CDC-RFA-EH17-1701PPHF17	2017	4

## HSC Review

---

### HSC Attributes

Program Evaluation	Yes
Quality Assurance / Improvement	Yes

### Regulation and Policy

---

Do you anticipate this project will be submitted to the IRB office  No

Estimated number of study participants

Population - Children

Population - Minors

Population - Prisoners

Population - Pregnant Women

Population - Emancipated Minors

Suggested level of risk to subjects Do you anticipate this project will be exempt research or non-exempt research

### Requested consent process wavers

Informed consent for adults	No Selection
Children capable of providing assent	No Selection
Parental permission	No Selection
Alteration of authorization under HIPPA Privacy Rule	No Selection

### Requested documents of informed consent

Informed consent for adults	No Selection
-----------------------------	--------------

**Children capable of providing assent** No Selection

**Parental permission** No Selection

### **Consent process shown in an understandable language**

**Reading level has been estimated** No Selection

**Comprehension tool is provided** No Selection

**Short form is provided** No Selection

**Translation planned or performed** No Selection

**Certified translation / translator** No Selection

**Translation and back-translation to/from target language(s)** No Selection

**Other method** No Selection

### **Clinical Trial**

**Involves human participants** No Selection

**Assigned to an intervention** No Selection

**Evaluate the effect of the intervention** No Selection

**Evaluation of a health related biomedical or behavioral outcome** No Selection

**Registerable clinical trial** No Selection

### **Other Considerations**

**Exception is requested to PHS informing those bested about HIV serostatus** No Selection

**Human genetic testing is planned now or in the future** No Selection

**Involves long-term storage of identifiable biological specimens** No Selection

**Involves a drug, biologic, or device** No Selection

**Conducted under an Investigational New Drug exemption or Investigational Device Exemption** No Selection
