**TITLE OF INFORMATION COLLECTION:** Registration for the 2<sup>nd</sup> NCI Workshop on Cell-Based Immunotherapy for Solid Tumors

**PURPOSE:** Cell-based immunotherapies have had remarkable success in the clinic, specifically in the treatment of hematologic malignancies. However, these strategies have had limited efficacy in patients with solid tumors. To better understand the challenges involved and how to facilitate further progress in the field, NCI is holding a workshop (organized by DCTD) on December 10-11, 2020 to engage in an interactive dialogue with intramural and extramural researchers. This virtual meeting will review current efforts in the development of autologous and allogeneic cell-based therapies, including cutting-edge technologies for designing, testing, and manufacturing cell therapies. The goal of the meeting is to identify knowledge gaps, resource needs, and critical barriers in the field, providing the basis for NCI to better support the extramural community and accelerate progress toward the treatment of solid tumors.

Session topics will include:

- Target Identification and Selection
- Safety Assessments and Toxicities
- Tumor Microenvironment and Cell Trafficking
- Immune Cell Fitness/Persistence and Monitoring Approaches
- Cell Product Manufacturing
- Regulatory and Clinical Aspects

**DESCRIPTION OF RESPONDENTS:** PIs/researchers, clinicians, and trainees (postdocs, fellows, and medical/graduate students) from government, academia, and industry
