NIH IT General Rules of Behavior

These Rules hold users accountable for their actions and responsible for information security. They apply to local, network, and remote use of HHS/NIH information (in both electronic and physical forms) and information systems by all NIH users, including federal employees, contractors, and other system users.

OMB# 0925-0767 exp., date 05/31/2023

I assert my understanding that:

- Information and system use must comply with HHS and NIH policies and standards, and with applicable laws.
- Use for other than official, assigned duties is subject to the HHS Policy for Personal Use of Information Technology Resources.
- Unauthorized access to information or information systems is prohibited.
- Users must prevent unauthorized disclosure or modification of sensitive information, including Personally Identifiable Information (PII).

I must:

General Security Practices

- Follow NIH security practices whether working at my primary workplace or remotely;
- Accept that I will be held accountable for my actions while accessing and using HHS/NIH information and information systems;
- Ensure that I have appropriate authorization to install and use software, including downloaded software on NIH systems and that before doing so I will ensure that all such software is properly licensed,
