

**Supporting Statement for Form SSA-754-F5**  
**Statement of Marital Relationship**  
**20 CFR 404.726**  
**OMB No. 0960-0038**

**A. Justification**

**1. Introduction/Authoring Laws and Regulations**

Section 216 (h)(1)(A) of the *Social Security Act (Act)* provides the authority for collecting the information requested on Form SSA-754-F5, Statement of Marital Relationship. The *Act* requires SSA to apply state law to determine an applicant's spousal relationship to the insured when applying for Federal Old-Age, Survivors, and Disability insurance benefits (Title II). If the applicant claims a common-law marriage to the insured in a state where such marriages are recognized, Section 20 CFR 404.726 of the *Code of Federal Regulations* directs SSA to obtain a signed statement from a spousal applicant when no formal marriage documentation exists.

**2. Description of Collection**

SSA uses the information we collect on Form SSA-754-F5 to determine if an individual applying for spousal benefits meets the criteria of common-law marriage under state law. The respondents are applicants for spousal Social Security benefits.

**3. Use of Information Technology to Collect the Information**

SSA provides a fillable and printable PDF version of Form SSA-754-F5 on our website. This collection does not currently have a fully public-facing Internet version, as we prioritized other information collections for full electronic conversions. As per our 4/3/20 conversation with OIRA, we welcome OIRA to join our conversations with OMB on IT Mods; however, as our IT Mod programming is an ongoing project, we cannot provide timelines for when we will be able to make any particular ICR available via the Internet. We will convert existing ICRs to full electronic versions depending on how they fall within our overall IT Mod schema, but this is unconnected to the PRA approval lifecycle.

**4. Why We Cannot Use Duplicate Information**

The nature of the information we collect and the manner in which we collect it preclude duplication. SSA does not use another collection instrument to obtain similar data.

**5. Minimizing Burden on Small Respondents**

This collection does not affect small businesses or other small entities.

**6. Consequences of Not Collecting Information or Collecting it Less Frequently**

If we did not use Form SSA-754-F5, we would have no way to determine whether the applicant's claim of common-law marriage meets state law and consequently,

Federal law. Because we collect this information on an as needed basis, we cannot collect it less frequently. There are no technical or legal obstacles to burden reduction.

**7. Special Circumstances**

There are no special circumstances that would cause SSA to conduct this information collection in a manner inconsistent with 5 CFR 1320.5.

**8. Solicitation of Public Comment and Other Consultations with the Public**

The 60-day advance Federal Register Notice published on November 27, 2020 at 85 FR 76142, and we received no public comments. The 30-day FRN published on January 28, 2021 at 86 FR 7446. If we receive any comments in response to this Notice, we will forward them to OMB.

**9. Payment or Gifts to Respondents**

SSA does not provide payments or gifts to the respondents.

**10. Assurances of Confidentiality**

SSA protects and holds confidential the information it collects in accordance with 42 U.S.C. 1306, 20 CFR 401 and 402, 5 U.S.C. 552 (Freedom of Information Act), 5 U.S.C. 552a (Privacy Act of 1974), and OMB Circular No. A-130.

**11. Justification for Sensitive Questions**

The information collection does not contain any questions of a sensitive nature.

**12. Estimates of Public Reporting Burden**

Please see the burden chart below:

Modality of Completion	Number of Respondents	Frequency of Response	Average Burden per Response (minutes)	Estimated Total Annual Burden (hours)	Average Theoretical Hourly Cost (dollars)*	Average Wait Time in Field Office (minutes) **	Total Annual Opportunity Cost (dollars)***
SSA-754-F5	30,000	1	30	15,000	\$25.72*	24**	\$694,440***

\* We based this figure on average U.S. worker’s hourly wages, as reported by Bureau of Labor Statistics data ([https://www.bls.gov/oes/current/oes\\_nat.htm](https://www.bls.gov/oes/current/oes_nat.htm)).

\*\* We based this figure on the average FY 2020 wait times for field offices, based on SSA’s current management information data.

\*\*\* This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. **There is no actual charge to respondents to complete the application.**

In addition, OMB’s Office of Information and Regulatory Affairs is requiring SSA to use a rough estimate of a 30-minute, one-way, drive time in our calculations of the time burden for this collection. OIRA based their estimation on a spatial analysis of SSA’s current field office locations and the location of the average population centers based on census tract information, which likely represents a 13.97-mile driving distance for one-way travel. We depict this on the chart below:

Total Number of Respondents Who Visit a Field Office	Frequency of Response	Average One-Way Travel Time to a Field Office (minutes)	Estimated Total Travel Time to a Field Office (hours)	Total Annual Opportunity Cost for Travel Time (dollars)*****
30,000	1	30	15,000	\$385,800

\*\*\*\*\* We based this dollar amount on the Average Theoretical Hourly Cost Amount in dollars shown on the burden chart above.

Per OIRA, we include this travel time burden estimate under the 5 CFR 1320.8(a) (4), which requires us to provide “time, effort, or financial resources expended by persons [for]...transmitting, or otherwise disclosing the information,” as well as 5 CFR 1320.8(b)(3)(iii) which requires us to estimate “the average burden collection...to the extent practicable.” SSA notes that we do not obtain or maintain any data on travel times to a field office, nor do we have any data, which shows that the average respondent drives to a field office, rather than using any other mode of transport. SSA also acknowledges that respondents’ mode of travel and, therefore, travel times vary widely dependent on region, mode of travel, and actual proximity to a field office.

NOTE: We included the total opportunity cost estimate from this chart in our calculations when showing the total opportunity cost estimates in the paragraph below.

The total burden for this ICR is **15,000** burden hours (reflecting SSA management information data), which results in an associated theoretical (not actual) opportunity cost financial burden of **\$1,080,240**. SSA does not charge respondents to complete our applications.

**13. Annual Cost to the Respondents**

This collection does not impose a known cost burden on the respondents.

**14. Annual Cost to Federal Government**

The annual cost to the Federal Government is approximately \$471,531. This estimate accounts for costs from the following areas:

<b>Description of Cost Factor</b>	<b>Methodology for Estimating Cost</b>	<b>Cost in Dollars*</b>
Designing and Printing the Form	Design Cost + Printing Cost	\$370
Distributing, Shipping, and Material Costs for the Form	Distribution + Shipping + Material Cost	\$1,303
SSA Employee (e.g., field office, 800 number, DDS staff) Information Collection and Processing Time	GS-9 employee x # of responses x processing time	\$450,000
Full-Time Equivalent Costs	Out of pocket costs + Other expenses for providing this service	\$0
Systems Development, Updating, and Maintenance	GS-9 employee x man hours for development, updating, maintenance	\$19,858
Quantifiable IT Costs	Any additional IT costs	\$0
<b>Total</b>		<b>\$471,531</b>

\* We have inserted a \$0 amount for cost factors that do not apply to this collection.

SSA is unable to break down the costs to the Federal government further than we already have. First, since we work with almost every US citizen, we often do bulk mailings, and cannot track the cost for a single mailing. In addition, it is difficult for us to break down the cost for processing a single form, as field office staff often help respondents fill out several forms at once, and the time it takes to do so can vary greatly per respondent. As well, because so many employees have a hand in each aspect of our forms, we use an estimated average hourly wage, based on the wage of our average field office employee (GS-9) for these calculations. However, we have calculated these costs as accurately as possible based on the information we collect for creating, updating, and maintaining these information collections.

**15. Program Changes or Adjustments to the Information Collection Request**  
There are no changes in the public reporting burden.

**16. Plans for Publication Information Collection Results**  
SSA will not publish the results of the information collection.

**17. Displaying the OMB Approval Expiration Date**  
OMB granted SSA an exemption from the requirement to print the OMB expiration date on its program forms. SSA produces millions of public-use forms with life cycles exceeding those of an OMB approval. Since SSA does not periodically revise and reprint its public-use forms (e.g., on an annual basis), OMB granted this exemption so SSA would not have to destroy stocks of otherwise useable forms with expired OMB approval dates, avoiding Government waste.

**18. Exceptions to Certification Statement**

SSA is not requesting an exception to the certification requirements at 5 *CFR* 1320.9 and related provisions at 5 *CFR* 1320.8(b)(3).

**B. Collections of Information Employing Statistical Methods**

SSA does not use statistical methods for this information collection.
