NORC at the University of Chicago is conducting an important study for the U.S. Department of Health and Human Services (DHHS) to learn the COVID-19 pandemic experiences of people who were looking after children under age 13 in a home-based setting before the pandemic. This information will help decision makers and local agencies obtain an accurate picture of what early care and education services are available to families across the country in order to make the most of their resources.

This survey takes about 20 minutes, and your participation is voluntary. You may choose not to answer any questions you don't wish to answer, or end the survey at any time. All personnel associated with this study must sign a legal document in which they pledge to protect the privacy of the information collected in the survey.
