Notes and Definitions:

1
Results from data as of July 16 from the EDB (Enrollment Database) that is used by IVD (Income Verification System) that is used by EED (Enrollment and Eligibility Division) and all VAMCs and clinics. Data was pulled f created in the EBD system for each of the three income years and then matched against ES to optain curren status.

2
Categories along the left edge of the spreadsheet are the categories that apply across all veterans, independ veteran is in. These categories are the basic veteran conditions (alive or deceased) and the veteran based ac the veteran terminates enrollment.

3 Percent columns indicate what percent that the count in the column to the left is of the total count in the Ca

4 When a case goes to Pending Means Test status, its priority group becomes blank

5 The last 5 pairs of columns represent rare conditions but are included to cover 100% of the data.
