

**Justification for Non-substantive/not material change
NCUA 4501A, Profile
OMB No. 3133-0204**

Many of the changes were previously approved by OMB but were not incorporated into the reporting cycle due to system changes and vendor support. The technology issues have now been resolved.

The non-substantive changes will remove outdate information elements for contemporary relevance, reorganize the pages to align with the tabs in the web-based data collection system (CUOnline), retire the Partnership Information pages, provide for additional selections items in drop-down window selections, and text changes throughout the form to improve readability.

The non-substantive changes will not alter the current estimated burden hours necessary to review the instructions and complete the form.
