#### **Pre-Transplant Essential Data**

OMB No: 0915-0310 Expiration Date: 10/31/2022

Public Burden Statement: The purpose of the data collection is to fulfill the legislative mandate to establish and maintain a standardized database of allogeneic marrow and cord blood transplants performed in the United States or using a donor from the United States. The data collected also meets the C.W. Bill Young Cell Transplantation Program requirements to provide relevant scientific information not containing individually identifiable information available to the public in the form of summaries and data sets. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection is 0915-0310 and it is valid until 10/31/2022. This information collection is voluntary under The Stem Cell Therapeutic and Research Reauthorization Act of 2010, Public Law 111–264 (the Act) and the Stem Cell Therapeutic and Research Reauthorization Act of 2015, Public Law 114-104. Public reporting burden for this collection of information is estimated to average 0.68 hours per response, including the time for reviewing instructions, searching existing data sources, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to HRSA Reports Clearance Officer, 5600 Fishers Lane, Room 14N136B, Rockville, Maryland, 20857 or paperwork@hrsa.gov.

  - □ Yes Go to question 77.
  - □ No Go to question 78.
- 78. Specify number of products infused from this donor: \_\_\_\_\_
- 79. Specify the number of these products intended to achieve hematopoietic engraftment: \_\_\_\_\_

Questions 80.-81. are for autologous HCT recipients only. If other than autologous skip to question 84..

- 80. What agents were used to mobilize the autologous recipient for this HCT? (check all that apply)
  - G-CSF (filgrastim, Neupogen)
  - Pegylated G-CSF (pegfilgrastim, Neulasta)
  - Plerixafor (Mozobil)
  - □ Combined with chemotherapy
  - □ Anti-CD20 (rituximab, Rituxan)
  - □ Other agent– Go to question 81.
  - 81. Specify other agent: \_\_\_\_\_
- 82. Name of product: (gene therapy recipients)

□ Other name

83. Specify other name: \_\_\_\_\_

To report more than one donor, copy questions 48.-83. and complete for each donor.

#### Clinical Status of Recipient Prior to the Preparative Regimen (Conditioning)

- 84. What scale was used to determine the recipient's functional status?
  - Karnofsky (recipient age  $\geq 16$  years) – Go to question 85.
  - Lansky (recipient age  $\geq$  1 year and < 16 years) – Go to question 86.

#### Performance score prior to the preparative regimen:

- 85. Karnofsky Scale (recipient age  $\geq$  16 years)
  - 100 Normal; no complaints; no evidence of disease - Go to question 87.
  - 90 Able to carry on normal activity - Go to question 87.
  - 80 Normal activity with effort - Go to question 87.
  - 70 Cares for self; unable to carry on normal activity or to do active work - Go to question 87.
  - 60 Requires occasional assistance but is able to care for most needs - Go to question 87.
  - 50 Requires considerable assistance and frequent medical care - Go to question 87.
  - 40 Disabled; requires special care and assistance - Go to question 87.
  - 30 Severely disabled; hospitalization indicated, although death not imminent - Go to question 87.
  - 20 Very sick; hospitalization necessary - Go to question 87.
  - 10 Moribund; fatal process progressing rapidly - Go to question 87.
- 86. Lansky Scale (recipient age  $\geq$  1 year and < 16 years)
  - 100 Fully active
  - 90 Minor restriction in physically strenuous play
  - 80 Restricted in strenuous play, tires more easily, otherwise active
  - 70 Both greater restrictions of, and less time spent in, active play
  - 60 Ambulatory up to 50% of time, limited active play with assistance / supervision
  - 50 Considerable assistance required for any active play; fully able to engage in quiet play
  - 40 Able to initiate quiet activities
  - 30 Needs considerable assistance for quiet activity
  - 20 Limited to very passive activity initiated by others (e.g., TV)
  - 10 Completely disabled, not even passive play
- Recipient CMV-antibodies (IgG or Total) 87.
  - Reactive
  - Non-reactive
  - Indeterminate
  - Not done

#### CIBMTR Center Number: \_\_\_\_ \_\_\_ \_\_\_ \_\_\_

**Comorbid Conditions** 

- 88. Has the patient been infected with COVID-19 (SARS-CoV-2) based on a positive test result at any time prior to the start of the preparative regimen / infusion?
  - □ Yes Go to question 89.
  - □ No Go to question 91.
  - 89. Did the patient require hospitalization for management of COVID-19 (SARS-CoV-2) infection?
    - □ Yes Go to question 90.
    - □ No Go to question 91.
    - 90. Was mechanical ventilation given for COVID-19 (SARS-CoV-2) infection?
      - □ Yes
      - □ No
- 91. Is there a history of mechanical ventilation (excluding COVID-19 (SARS-CoV-2)?
  - □ Yes
  - □ No
- 92. Is there a history of invasive fungal infection?
  - □ Yes
  - □ No
- 93. Glomerular filtration rate (GFR) before start of preparative regimen (pediatric only)
  - □ Known- Go to question 94.
  - Unknown- Go to question 95.
  - 94. Glomerular filtration rate (GFR): \_\_\_\_ mL/min/1.73<sup>2</sup>
- 95. Does the recipient have known complex congenital heart disease? (corrected or uncorrected) (excluding simple ASD, VSD, or PDA repair) (pediatric only)
  - □ Yes
  - □ No
- 96. Were there any co-existing diseases or organ impairment present according to the HCT comorbidity index (HCT-CI)? (Source: Sorror, M. L. (2013). How I assess comorbidities before hematopoietic cell transplantation. Blood, 121(15), 2854-2863.)
  - □ Yes- Go to question
  - □ No- Go to question 102.

Specify co-existing diseases or organ impairment (check all that apply)

**CIBMTR Form 2400 R8 (16 – 25) Draft 29Sep2020** Copyright <sup>©</sup> 2007 National Marrow Donor Program and The Medical College of Wisconsin, Inc. All rights reserved.

- Arrhythmia - Any history of atrial fibrillation or flutter, sick sinus syndrome, or ventricular arrhythmias requiring treatment
- Cardiac -Any history of coronary artery disease (one or more vessel-coronary artery stenosis requiring medical treatment, stent, or bypass graft), congestive heart failure, myocardial infarction, OR ejection fraction ≤ 50% on the most recent test
- Cerebrovascular disease -Any history of transient ischemic attack, subarachnoid hemorrhage or cerebral thrombosis, embolism, or hemorrhage
- Diabetes -Requiring treatment with insulin or oral hypoglycemic drugs in the last 4 weeks but not diet alone
- Heart valve disease -At least a moderate to severe degree of valve stenosis or insufficiency as determined by Echo; prosthetic mitral or aortic valve; or symptomatic mitral valve prolapse
- Hepatic, mild - Bilirubin > upper limit of normal to 1.5 × upper limit of normal, or AST/ALT > upper limit of normal to 2.5 × upper limit of normal at the time of transplant OR any history of hepatitis B or hepatitis C infection
- Hepatic, moderate/severe -Liver cirrhosis, bilirubin > 1.5 × upper limit of normal, or AST/ALT > 2.5 × upper limit of normal
- Infection -Includes a documented infection, fever of unknown origin, or pulmonary nodules suspicious for fungal pneumonia or a positive PPD test requiring prophylaxis against tuberculosis. Patients must have started antimicrobial treatment before Day 0 with continuation of antimicrobial treatment after Day 0
- Inflammatory bowel disease -Any history of Crohn's disease or ulcerative colitis requiring treatment
- Obesity -Patients older than 18 years with a body mass index (BMI) > 35 kg/m2 prior to the start of conditioning or a BMI of the 95th percentile of higher for patients aged 18 years or younger
- Peptic ulcer -Any history of peptic (gastric or duodenal) ulcer confirmed by endoscopy or radiologic diagnosis requiring treatment
- Psychiatric disturbance -Presence of any mood (e.g., depression), anxiety, or other psychiatric disorder (e.g. bipolar disorder or schizophrenia) requiring continuous treatment in the last 4 weeks
- Pulmonary, moderate -Corrected diffusion capacity of carbon monoxide and/or FEV1 of 66-80% or dyspnea on slight activity attributed to pulmonary disease at transplant
- Pulmonary, severe -Corrected diffusion capacity of carbon monoxide and/or FEV1 of  $\leq$  65% or dyspnea at rest attributed to pulmonary disease or the need for intermittent or continuous oxygen during the 4 weeks prior to transplant
- Renal, moderate / severe -Serum creatinine > 2 mg/dL or > 177 µmol/L; on dialysis during the 4 weeks prior to transplant; OR prior renal transplantation -go to question 97.
- Rheumatologic -Any history of a rheumatologic disease (e.g., systemic lupus erythematosis, rheumatoid arthritis, polymyositis, mixed connective tissue disease, or polymyalgia rheumatica, etc.) requiring treatment. (Do NOT include degenerative joint disease, osteoarthritis)
- Prior malignancy-Treated at any time point in the patient's past history, other than the primary disease for which this infusion is being performed -go to question 98.
- 97. Was the recipient on dialysis immediately prior to start of preparative regimen?

- □ No
- □ Unknown
- 98. Specify prior malignancy (check all that apply)
  - Breast cancer
  - Central nervous system (CNS) malignancy (e.g., glioblastoma, astrocytoma)
  - Gastrointestinal malignancy (e.g., colon, rectum, stomach, pancreas, intestine, esophageal)
  - Genitourinary malignancy (e.g., kidney, bladder, ovary, testicle, genitalia, uterus, cervix, prostate)
  - □ Leukemia (includes acute or chronic leukemia)
  - □ Lung cancer
  - Lymphoma (includes Hodgkin & non-Hodgkin lymphoma)
  - MDS / MPN
  - Melanoma
  - □ Multiple myeloma / plasma cell disorder (PCD)
  - □ Oropharyngeal cancer (*e.g.*, *tongue*, *buccal mucosa*)
  - □ Sarcoma
  - □ Thyroid cancer
  - D Other skin malignancy (basal cell, squamous)- go to question 99.
  - □ Other hematologic malignancy -go to question 100.
  - □ Other solid tumor, prior *-go to question 101.*
  - 99. Specify other skin malignancy: (prior)

100. Specify other hematologic malignancy: (prior)

101. Specify other solid tumor: (prior)

Use results within 4 weeks prior to the start of the preparative regimen, report results from the test performed closest to the start date. Biomarkers according to the augmented HCT comorbidity index. (*Source: Biol Blood Marrow Transplant. 2015 Aug; 21(8): 1418–1424*)

102. Serum ferritin (within 4 weeks prior to the start of the preparative regimen, use result closest to the start date)

- □ Known Go to question 103.

## **GVHD Prophylaxis**

This section is to be completed for allogeneic HCTs only; autologous HCTs continue with question 143.

- 140. Was GVHD prophylaxis planned?
  - □ Yes Go to question 141.
  - □ No Go to question 143.
  - 141. Specify drugs / intervention (check all that apply)
    - □ Abatacept
    - Anti CD 25 (Zenapax, Daclizumab, AntiTAC)
    - Blinded randomized trial
    - □ Bortezomib
    - □ CD34 enriched (CD34+ selection)
    - □ Corticosteroids (systemic)
    - □ Cyclophosphamide (Cytoxan)
    - Cyclosporine (CSA, Neoral, Sandimmune)
    - □ Extra-corporeal photopheresis (ECP)
    - □ Ex-vivo T-cell depletion
    - □ Filgotinib
    - □ Maraviroc
    - □ Methotrexate (MTX) (Amethopterin)
    - □ Mycophenolate mofetil (MMF) (CellCept)
    - Ruxolotinib
    - □ Sirolimus (Rapamycin, Rapamune)
    - □ Tacrolimus (FK 506)

142. Specify other agent: \_\_\_\_

- Tocilizumab
- □ Other agent-*go to question 142.*

\_\_\_\_\_ (do not report ATG, campath)

CIBMTR Form 2400 R8 (23 – 25) Draft 29Sep2020

#### Post-HCT Disease Therapy Planned as of Day 0

#### 143. Is additional post-HCT therapy planned?

- Yes Go to question 144.
- No Go to First Name

#### Questions 144.-145. are optional for non-U.S. centers

- 144. Specify post-HCT therapy planned (check all that apply)
  - □ Azacytidine (Vidaza)
  - □ Blinatumomab
  - Bortezomib (Velcade)
  - Bosutinib
  - Brentuximab
  - Carfilzomib
  - Cellular therapy (e.g. DCI, DLI)
  - Crenolanib
  - Daratumumab
  - Dasatinib
  - Decitabine
  - Elotuzumab
  - □ Enasidenib
  - □ Gilteritinib
  - □ Ibrutinib
  - □ Imatinib mesylate (Gleevec, Glivec)
  - □ Intrathecal therapy (chemotherapy)
  - Ivosidenib
  - Ixazomib
  - □ Lenalidomide (Revlimid)
  - Lestaurtinib
  - □ Local radiotherapy
  - □ Midostaurin
  - □ Nilotinib
  - Obinutuzumab
  - Pacritinib
  - Ponatinib
  - □ Quizartinib

- Rituximab (Rituxan, MabThera)
- Sorafenib
- Sunitinib
- Thalidomide (Thalomid)
- Other therapy- Go to question 145.
- Unknown

145. Specify other therapy: \_\_\_\_\_

Prior Exposure: Potential Study Eligibility

Selecting any option(s) below may generate an additional supplemental form.

- 146. Specify if the recipient received any of the following (at any time prior to HCT / infusion) (check all that apply)
  - Blinatumomab (Blincyto)
  - Gemtuzumab ozogamicin (Mylotarg)
  - Inotuzumab ozogamicin (Besponsa)
  - Adienne Tepadina®
  - Mogamulizumab (Poteligeo)
  - None of the above
