SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection. The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology. Consistent with the requirements of Executive Order 13771, Reducing Regulation and Controlling Regulatory Costs, and Executive Order 13777, Enforcing the Regulatory Reform Agenda, the Coast Guard is also requesting comments on the extent to which this request for information could be modified to reduce the burden on respondents. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, [USCG-2020-0185], and must be received by October 5, 2020.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard published the 60-day notice (85 FR 28646, May 13, 2020) required by 44 U.S.C. 3506(c)(2). We received four submissions to the 60-day Notice. Three submissions were unrelated to the Notice, and one submission had four ICR-related comments. The first comment noted that the Response Resource Inventory (RRI) is a practical and useful tool for the Coast Guard to maintain a national database for response equipment. The second comment stated that the estimated time and cost burden seem to be accurate. The third comment suggested that the Coast Guard should consider enhancing the RRI by updating the database technology and creating a public-facing portal to allow non-OSRO (Oil Spill Removal Organizations) to access the inventory. Because the data entered into RRI, including OSRO inventories, is categorized as For Official Use Only (FOUO), it is not releasable to the public. The fourth comment suggested that the Coast Guard modernize data collection technology to reduce the burden of information collection through automation. Due to resource constraints, the Coast Guard has not yet developed a plan to modernizing data collection through automation. In response to the comments, no changes were made to the Collection.
