Record Keeping and Reporting Burden by Emission Point

Note: This table is used to calculate the record keeping and reporting burden by emission point for the PVC NESHAP. The costs presented in the table below represent costs not otherwise included in the PVC NESHAP Impact estimate (i.e., testing and monitoring costs are already included in the PVC NESHAP impacts estimate, therefore, they are not included in the table below). The costs presented in the table below should be added to the previously calculated PVC Impacts to obtain an impacts estimate which includes record keeping and reporting.

a. Perf. spec. tests (certif.) for CMS	11	1	11

Notes:

2. Person-hours per occurrence for CMS performance specification costs are based on the performance specification costs to certify CMS (\$700) divided by the composite hourly labor rate (\$66.41/hr).

Capital/Startup vs. Operation and Maintenance (O&M) Costs

Capital/Startup/O&M Item	(A) Capital/Startup Cost for One Respondent	(B) Number of New Respondents	(C) Total Capital/Startup Cost (C = A x B)
Stripped Wastewater: TOHAP Testing ¹	\$654	0	\$0
Uncontrolled Wastewater: TOHAP Testing ²	\$1,693	0	\$0
Total			\$0

Note: Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

O&M costs shown as negative to reflect savings from no longer performing TOHAP wastewater testing.

¹ Average cost for TOHAP testing is \$654 per major source, and 1 test per major source per month.

² TOHAP testing on uncontrolled streams is performed annually. There are an average of 3 uncontrolled streams per facilit

(D) Annual O&M Costs for One Respondent	(E) Number of Respondents with O&M	(F) Total O&M (F = D x E)
-\$7,850	14	-\$109,899
-\$1,693	14	-\$23,704
		-\$134,000
