Non-substantive Change Request

(0535-0109) Ag Labor Survey

NASS is currently approved to conduct a labor survey twice a year to collect quarterly agricultural labor data along with a bridge study to be conducted simultaneously. Based on recent cognitive testing slight wording changes have been made to both the regular survey for October 2018 along with the bridge study questionnaire. In addition, on the bridge study questionnaire the column that collected data for "Total Incentive & Overtime Wages Paid That Week" has been separated into two columns "Total Bonus Wages" and "Total Overtime Wages". The cognitive testing showed that this would make it easier for the respondents to report their data.

No new burden or respondents are being added to the current approval.
