

SUPPORTING STATEMENT JUSTIFICATION FOR COMMON OR USUAL NAME FOR RAW MEAT AND POULTRY PRODUCTS CONTAINING ADDED SOLUTIONS

1. Circumstances Making Collection Of Information Necessary:

This is a request for renewal of the information collection for product labeling requirements for meat and poultry products containing added solutions.

The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, et seq.) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, et seq.). These statutes mandate that FSIS protect the public by verifying that meat and poultry products are safe, wholesome, not adulterated, and properly labeled and packaged.

FSIS regulations establish a common or usual name for raw meat and poultry products that do not meet standard of identity regulations and to which solutions have been added. Products with added solutions are sometimes referred to as “enhanced products.” FSIS requires that establishments that manufacture products containing added solutions to identify the common or usual name for such products and include an accurate description of the raw meat or poultry component, the percentage of added solution incorporated into the raw meat or poultry product, and the individual ingredients or multi-ingredient components in the solution listed in the descending order of predominance by weight. FSIS also requires that the print for all words in the common or usual name appear in a single font size, color, and style of print and that the name appear on a single-color contrasting background. In addition, the Agency removed the regulatory standard of identity for “ready-to-cook poultry products to which solutions are added.”

2. How, By Whom and Purpose Information Is To Be Used:

The following is a discussion of the required information collection and recordkeeping activities.

FSIS requires establishments that manufacture products containing added solutions to meet the standard of identity regulations. Without specific, clear, and conspicuous information about the percentage of added solution incorporated into meat or poultry product, the labeling of raw meat or poultry products that do not meet a standard of identity is likely to be misleading to consumers. Labels must inform consumers that the product contains added solutions.

There are a total of 61,000 burden hours for the information collection request relating to labeling requirements for meat and poultry product containing added solutions.

3. Use Of Improved Information Technology:

Establishments and retail stores may make use of electronic recordkeeping.

4. Efforts To Identify Duplication:

FSIS has determined that these information collections will not duplicate any other information collections. The required records and reports are not available from other sources, either within government or from non-government sources. There is no similar information that can be used or modified.

5. Methods To Minimize Burden On Small Business Entities:

Data collected from small businesses are the same as for large ones. FSIS estimates that 5,719 small establishments and retail firms would be affected by this collection.

6. Consequences If Information Were Collected Less Frequently:

To conduct the information collections less frequently would reduce the effectiveness of the meat and poultry inspection program.

7. Circumstances That Would Cause The Information Collection To Be Conducted In A Manner:

- requiring respondents to report information to the agency more often than quarterly;
- requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
- requiring respondents to submit more than an original and two copies of any document;
- requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;
- in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
- requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
- that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
- requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.

Respondents must maintain a copy of the label records as long as they use the label; there are no other special circumstances that require the collection of information to be inconsistent with the above guidelines.

8. Consultation With Persons Outside The Agency:

FSIS published a 60-day notice in the **Federal Register** (December 21, 2020; 85 FR 83034). FSIS received no comments related to the information collection. The Agency also contacted three establishments to request comment on the Agency's estimates and reduction in burden associated with the proposed rule (Robert Taylor, 919-921-9188; and Tami Strickland, 479-290-4032; and Debbie Nece,

316-858-5056). They all agreed with the Agency's estimates.

9. Payment Or Gifts To Respondents:

Respondents do not receive gifts or payments.

10. Confidentiality Provided To Respondents:

No assurances other than routine protection provided under the Freedom of Information Act have been provided to respondents.

11. Questions Of A Sensitive Nature:

The applicants are not asked to furnish any information of a sensitive nature.

12. Estimate Of Burden:

The total estimated burden for this information collection is 61,000 burden hours.

FSIS estimates that 6,100 establishments and retailers will 8 times a year take an average of 75 minutes to develop, submit, and file labels for products with added solutions for a total of 48,800 responses and 61,000 hours.

**DEVELOP NEW LABELS FOR PRODUCTS CONTAINING ADDED SOLUTIONS
(9 CFR 317.2 & 381.117(h))**

Type of Establish-ment	No. of Respon-dents	No. of Res-ponses per Respon-den-t	Total Annual Responses	Time for Response in Mins.	Total Annual Time in Hours
Ests./ firms	6,100	8	48,800	75	61,000

The cost to the respondents is estimated at \$2,766,350 annually. The Agency estimates that it will cost respondents \$45.35, including fringe benefits, in fulfilling these information collection requirements. Respondents will spend an annual total of 61,000 hours and \$2,766,350. The hourly rate for the respondents was attained from the Department of Labor Bureau of Labor and Statistics wage data, May, 2019.

13. Capital, Start-up Cost, And Subsequent Maintenance

There are no capital or start-up costs related to this information collection activity.

14. Annual Cost To The Federal Government:

The cost to the Federal Government for this information collection is \$1,088,400 annually. The Agency estimates a cost of \$45.35 per hour, including fringe benefits, for the time of its personnel.

15. Reasons For Changes In Burden:

There is no change in burden for this information collection.

16. Tabulation, Analyses And Publication Plans:

There are no plans to publish the data for statistical use.

17. OMB Approval Number Display:

FSIS will display the OMB approval number on any instructions it publishes relating to recordkeeping activities.

18. Exceptions To The Certification:

There are no exceptions to the certification. This information collection accords with the certification in item 19 of the OMB 83-I.
