As is done with the individual tax form burden estimates (Forms 1040, 1040-EZ, 1040-A, 1040-X and 1040-NR), clearance for the burden estimate will be requested before the relevant tax filing season but after the IRS has had the opportunity to update its models with prior year data and to make necessary revisions to draft forms (including providing drafts to public for comment), and is sought on an annual basis instead of on the regular 3-year Paperwork Reduction Act (PRA) cycle. 4. ESTIMATED BURDEN OF INFORMATION COLLECTION

Today, over 90 percent of all business entity tax returns are prepared using software by the taxpayer or with preparer assistance. These are forms used by business taxpayers. These include Forms 1065, 1066, 1120, 1120-C, 1120-F, 1120-H, 1120-ND, 1120-S, 1120-SF, 1120-FSC, 1120-L, 1120-PC, 1120-REIT, 1120-RIC, 1120-POL, and related schedules, that business entity taxpayers attach to their tax returns.

Tax Compliance Burden Model:

Tax compliance burden model is defined as the time and money taxpayers spend to comply with their tax filing responsibilities. Time-related activities include recordkeeping, tax planning, gathering tax materials, learning about the law and what you need to do, and completing and submitting the return. Out-of-pocket costs include expenses such as purchasing tax software, paying a third-party preparer, and printing and postage. Tax compliance burden does not include a taxpayer’s tax liability, economic inefficiencies caused by sub-optimal choices related to tax deductions or credits, or psychological costs.

Tables 1, 2, and 3 below show the burden model estimates for each of the three classifications of business taxpayers: Partnerships (Table 1), corporations (Table 2) and S corporations (Table 3). As the tables show, the average filing compliance is different for the three forms of business. Showing a combined average burden for all businesses would understate the burden for corporations and overstate the burden for the two pass-through entities (partnerships and corporations). In addition, the burden for small and large businesses is shown separately for each type of business entity in order to clearly convey the substantially higher burden faced by the largest businesses.

14. ESTIMATED ANNUALIZED COST TO THE FEDERAL GOVERNMENT

The Federal government cost estimate is based on a model that considers the following three cost factors for each information product: aggregate labor costs for development, including annualized start-up expenses, operating and maintenance expenses, and distribution of the product that collects the information.

The government computes cost using a multi-step process. First, the government creates a weighted factor for the level of effort to create each information collection product based on variables such as; complexity, number of pages, type of product and frequency of revision. Second, the total costs associated with developing the product such as labor cost, and operating expenses associated with the downstream impact such as support functions, are added together to obtain the aggregated total cost. Then, the aggregated total cost and factor are multiplied together to obtain the aggregated cost per product. Lastly, the aggregated cost per product is added to the cost of shipping and printing each product to IRS offices, National Distribution Center, libraries and other outlets. The result is the Government cost estimate per product.

The government cost estimate for this collection is summarized in the table below.

15. REASONS FOR CHANGE IN BURDEN

Changes in estimated aggregate compliance burden are due entirely to adjustments in agency estimates. IRS has conducted a re-baselining of the burden estimates for business entity filers based on new survey data, which indicate that the previous burden was significantly over-estimated.

The following table provides an overview of these technical adjustments:

Annual Responses and Burden with Changes

	FY 2021 Requested	Program Change Due to New Statute	Program Change Due to Agency Discretion	Change Due to Adjustment in Agency Estimate	Change Due to Potential Violation of the PRA	FY 2020 Previously Approved
Annual Number of Responses	11,800,000	0	0	(200,000)	0	12,000,000
Annual Time Burden (Hours)	1,085,000,000	0	0	(2,259,000,000)	0	3,344,000,000
Annual Out-of-pocket Cost Burden (Dollars)	44,279,000,000	0	0	(17,279,000,000)	0	61,558,000,000
Total Monetized Labor Costs (Dollars)	95,803,000,000	0	0	(95,178,000,000)	0	190,981,000,000

16. PLANS FOR TABULATION, STATISTICAL ANALYSIS AND PUBLICATION

The intent of this collection is to collect data in areas of income, gains, losses, deductions, credits, and to figure the income tax liability of a business taxpayer.

17. REASONS WHY DISPLAYING THE OMB EXPIRATION DATE IS INAPPROPRIATE

We believe that displaying the OMB expiration date is inappropriate because it could cause confusion by leading taxpayers to believe that the forms sunset as of the expiration date. Taxpayers are not likely to be aware that the Service intends to request renewal of the OMB approval and obtain a new expiration date before the old one expires.

18. EXCEPTIONS TO THE CERTIFICATION STATEMENT

There are no exceptions to the certification statement.

Note: The following paragraph applies to all of the collections of information in this submission:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.
