SUPPLEMENTARY INFORMATION:**I. Background**

U.S.C. 813(h), authorizes MSHA to collect information necessary to carry

out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

Continuous Personal Dust Monitors (CPDMs) determine the concentration of respirable dust in coal mines. CPDMs must be designed and constructed for coal miners to wear and operate without impeding their ability to perform their work safely and effectively, and must be durable to perform reliably in normal working conditions of coal mines. Paperwork requirements imposed on applicants are related to the application process and CPDM testing procedures.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Coal Mine Dust Sampling Devices. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. SUPPLEMENTARY INFORMATION:

I. Background

Big Rock Point is located in Charlevoix County, Michigan, approximately 11 miles west of Petoskey, on the northern shore of Michigan's Lower Peninsula. The BRP nuclear plant was a boiling water reactor rated at 75 MW electric and began commercial operation in March 1963. The plant was permanently shut down on August 29, 1997, and Consumer's Energy (CE) submitted a post shutdown decommissioning activities report on September 19, 1997 (ADAMS Accession No. ML19196A241). In accordance with the requirements of paragraph 50.82(a)(9) of title 10 of the *Code of Federal Regulations* (10 CFR), the licensee submitted BRP's license termination plan (LTP) for its facility. The licensee constructed an onsite ISFSI under its 10 CFR part 50 general license (SFGL-16) and completed the transfer of all spent nuclear fuel to the ISFSI in May 2003 (ADAMS Accession No. ML031270219). After the release of land from the part 50 license in January 2007 (ADAMS Accession No. ML063410368), the remaining onsite area is a parcel of land approximately 30 acres, within which the ISFSI is located, and an additional parcel of approximately 75 acres adjacent to the ISFSI.

By order dated April 6, 2007 (ADAMS Accession No. ML070740758), the NRC approved the direct transfer of Possession Only License No. DPR-06 for BRP from CE to Entergy Nuclear Palisades, LLC (ENP), and ENO, and approved a conforming license amendment, pursuant to 10 CFR 50.80, "Transfer of licenses," and 10 CFR 72.50, "Transfer of license," to reflect the change. The order was published in the **Federal Register** (FR) on April 16, 2007 (72 FR 19056). Accordingly, the project name was changed from Big Rock Point Restoration Project to Big Rock Point ISFSI.
