

2700-0017 – NASA Property in the Custody of Contractors

Justification for a non-substantive change

The logic employed on NASA Form (NF) 1018 is preventing contractors within certain property value thresholds from selecting certain existing dropdown options for the “Property Classification Accounts <\$100K” and “Property Classification Accounts <\$500K” version of the form. This logic is overly restrictive and needs to be modified so respondents can accurately and completely report information to NASA.

The following dropdown options on the “<\$100K” version of the form will be made available to a wider range of respondents:

- Land
- Buildings
- Other Structures & Facilities
- Leasehold Improvements

The following dropdown options on the “<\$500K” version of the form will be made available to a wider range of respondents:

- Land
- Buildings
- Other Structures & Facilities
- Leasehold Improvements
- Special Test Equipment
