{The fields in light yellow can be modified or are optional. The applicant is required to resolve annual budget years, e.g. 2018 - Federal/Match), to streamline the upload process into the SQL database. This ranges from 1-4 years. The other fields (Project ID, Type, Principal Investigator, Title) are populated from other worksheets or calculated (OVERALL FEDERAL/MATCH) within the spreadsheet document.)

The information collected and structure in the Long and Short are identical, however the Long version allows multi-projects to be included in one file.

NOAA FORM 90-2: SEA GRANT Project Summary
(statement included in separate worksheet within the Form 90-2 Excel document)

PAPERWORK REDUCTION ACT, PRIVACY ACT, AND PUBLIC BURDEN

NOAA's National Sea Grant College Program exists to increase the understanding, assessment, development, utilization, and conservation of the Nation's ocean, coastal, and Great Lakes resources. It does this by providing grant monies to promote a strong educational base, responsive research, and training. The information requested on this form is required in order to be considered for an award under the authority of the National Sea Grant College Act, as amended. The form provides information on collaborations between governmental organizations, industry, and the Sea Grant program, and also collects project summary information, as well as meta-data for tracking and analysis. The information collected forms the basis for many of our responses to the Administration, the Congress, other agencies, and to the public about the scope of Sea Grant activities. The information requested may be disclosed to qualified reviewers and staff assistants as part of the application review process; to applicant institutions/grantees to provide or obtain data regarding the application review process, award decisions, or the administration of awards; to government contractors, experts, volunteers and researchers as necessary to complete assigned work; to other government agencies needing information as part of the review process or in order to coordinate programs; and to another Federal agency, court or party in a court or Federal administrative proceeding if the Government is a party. Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.

A Federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with an information collection subject to the requirements of the Paperwork Reduction Act of 1995 unless the information collection has a currently valid OMB Control Number. The approved OMB Control Number for this information collection is 0648-0362. Without this approval, we could not conduct this information collection. Public reporting for this information collection is estimated to be approximately 15-20 minutes/hours per response (depending on Form), including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information collection. All responses to this information collection are required to obtain benefits. Send comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing this burden to the National Sea Grant College Program, R/SG, NOAA, 1315 East-West Highway, Silver Spring, MD 20910 (Attn: Paperwork Reduction Act - Jonathan Eigen).
